

efalia ecm

Architecture

Secure and Reliable

1. Tier	Either the Efalia ECM Mobile app, a Windows Client, a browser respectively an SDK.
2. Tier	The Efalia ECM WebService.
3. Tier	Either a Microsoft SQL or Oracle database.

The Efalia ECM architecture ensures that users cannot access the data source directly and the system runs stably and securely.

The two-factor authentication and a http/https connection with TLS 1.2 complements the security design.

In addition, the SOAP and REST capabilities of the Efalia ECM WebService are offering a wide range of connectivity options.
