Dashboard

Your overview

Stay informed

Efalia ECM Dashboard is part of every Efalia ECM SBE or Enterprise WebServer licence and is fully integrated into it.
The dashboard functionality helps you keeping track of your business processes or creating auto-updating charts, based on Efalia ECM field values.
Each cabinet can contain multiple Dashboards.
Dashboard can be set-up with filters, which helps you to get exactly the information you need.
Efalia ECM Dashboard is your information centre for ongoing business processes.

Visible, but secure

The security of Efalia ECM Dashboard is fully integrated into the Efalia ECM rights management.
Grant users or groups either the right to view or edit Dashboards within a cabinet, simply done within the administrative user interface of Efalia ECM systems.

On premise and off premise

Efalia ECM Dashboard is also part of our Cloud installations.
As the configuration is done per cabinet and stored within the corresponding database, the displayed information is completely separated and, in addition, it is already included in your database backup plan.
