SAP

Link Business Documents

Teamwork

Storing and working with SAP Business Documents is a simple and nearly automatic task with an Efalia ECM system and AchiveLink.
Just open an SAP Business Object in the SAP GUI, click store from the menu, select a document type and the document to attach. Confirm the Efalia ECM Content Repository and it's done.
Now the SAP system stores the document in Efalia ECM and links it to the SAP business object automatically.

One Process – Multiple Benefits

This simple task makes the document accessible from Efalia ECM WinClient or Efalia ECM WebServer and the SAP system. In the SAP system, it is accessible from the SAP business object or through the technical search for ArchiveLink documents.

Availability

- From the SAP business object
- Through the technical search for AchiveLink documents
- In Efalia ECM WinClient
- In Efalia ECM WebServer

A Proven Solution

Efalia ECM ArchiveLink offers a proven integration for SAP S4/HANA via the SAP integration scenario S/4-BC-AL 7.40.

- HTTP Content Server Functionality
- OLE Frontend Functionality
- Barcode BAPI

BC-AL connects content management systems to SAP. It is based on HTTP and a SAP NetWeaver BAPI interface.
