Software Licence Agreement

IMPORTANT: Read this agreement before installing Efalia ECM. By installing Efalia ECM you are deemed to agree to be bound by this agreement.

This licence agreement is a legal document between you and Efalia GmbH. If you do not agree to the terms of this agreement return the software CD and accompanying documentation (the "Documentation") and other items to the place from where you obtained them for a refund before they are marked or damaged in any way.

In consideration of the right to use the Software you agree to abide by the terms and conditions of this agreement.

GRANT OF LICENCE

The Software consists of the software modules by:

Efalia GmbH, a German public listed company having its place of business at Obere Kaiserswerther Str. 17, 47249 Duisburg, Germany ("Efalia");

Microsoft Corp., a Washington corporation having its place of business at 1 Microsoft Way, Redmond, WA 98052-6399, USA ("Microsoft");

Softland, a Romanian company having its place of business at str. Traian Grozavescu no. 2/1 Cluj-Napoca 400305, Romania ("Softland");

Tungsten Automation Corporation, a Florida company having its place of business at 333 Las Olas Way, Suite 212, Ft Lauderdale, FL 33301, USA ("Tungsten;");

Developer Express Inc., a Nevada company having its place of business at 6340 Mcleod Dr. Suite1, Las Vegas, NV 89120, USA ("DevExpress");

Oracle Corporation, a Californian company having its place of business at 500 Oracle Parkway, M/S 5op7, Redwood Shores, California 94065, USA ("Oracle");

Apryse, a British Columbia corporation, having offices at 838 West Hastings Street, Suite 500, Vancouver, British Columbia, V6C 0A6, Canada ("Apryse").

The software consists also of Open Source modules, listed below:

Software, which is based in part on the work of the Independent JPEG Group.

Cryptographic software written by Eric Young (eay@cryptsoft.com).

It uses the FreeImage open source image library. See http://freeimage.sourceforge.net for details.

FreeImage is used under the FreeImage Public License (FIPL) version 1.0.

LibTIFF Copyright (c) 1988-1997 Sam Leffler

LibTIFF Copyright (c) 1991-1997 Silicon Graphics, Inc.

LibTIFF: Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that (i) the above copyright notices and this permission notice appear in all copies of the software and related documentation, and (ii) the names of Sam Leffler and Silicon Graphics may not be used in any advertising or publicity relating to the software without the specific, prior written permission of Sam Leffler and Silicon Graphics.

You understand and acknowledge that any software module included in the Software may have utility with or be able to be called by other software and/or hardware, which Efalia considers to be an unauthorised use of the Software. Accordingly, you agree that you will use such software modules only as part of the Software and not in conjunction with, or as part of, or as a component of other software and/or hardware which makes calls to such software modules.

Efalia grants you the personal non-exclusive rights:

For a single-user version of the Software, to install and use the Software for internal purposes only on a single computer (the Software is considered in use when it is installed in the temporary memory, i.e. RAM, or the permanent memory, i.e. Hard Disk Drive).

For a multi-user version of the Software, to install and use the Software for internal purposes only for the number of computers or simultaneous users identified in the Installation Configuration sheet of the Software package (for example, if you have purchased a 5-User licence you may install the Software for simultaneous use by up to 5 Users on a network).

BACKUP COPY

You may make whatever copies you deem appropriate from the Efalia ECM "delivery" Compact Disc, the Programs, Example Files and any other promotional material that may be included thereon. The Application Manual, or any part thereof, may be reproduced in sufficient quantity to support only the number of users licenced to you and no more. You must reproduce and include on the backup copy the copyright notice and other ownership or proprietary legends that are on the original copy of the Software.

You may NOT make or attempt to make any copy whatsoever of the Efalia ECM Licence. ANY ATTEMPT TO COPY, TRANSFER OR RESTORE THE LICENCE MAY CORRUPT THE ENABLING LICENCE. The Licence, once enabled, represents the full purchase value of the licence to use the Efalia ECM Software. The enabled Licence can be manipulated ONLY by the commands within the Efalia ECM application.

RESTRICTIONS

You may not market, distribute or transfer the Software or the Documentation to others, or electronically transfer the Software from one computer to another over a network except as expressly provided herein.

You may not de-compile, reverse engineer, disassemble or otherwise reduce the code of the Software to a human perceivable form.

You may not modify, adapt, translate, rent, lease or loan the Software or the Documentation or create derivative works based on the Software or the Documentation.

OWNERSHIP AND COPYRIGHT

Efalia, Microsoft, Stellent, Tungsten, DevExpress, Apryse and Pixel reserve all rights to their respective software modules of the Software and the Documentation. The Software and the Documentation is copyrighted. Unauthorised copying of the Software, including portions thereof, or the Documentation is expressly forbidden.

EXPORT CONTROL

You agree that the Software and Documentation will not be shipped, transferred or exported into any country or used in any manner prohibited by the United States Export Administration Act or any other applicable export control laws, restrictions or regulations of the countries involved.

SUPPORT AND UPDATES

Efalia, Efalia's subsidiaries or affiliates, their distributors and dealers are not responsible for maintaining or helping you to use the Software and the Documentation, excepting where agreements have been entered into between specific parties, i.e. Efalia: Distributor, Distributor: Dealer, Dealer: End User.

No updates, fixes or support will be made available for the Software and Documentation other than by publishing such revisions on the Efalia web site: https://www.spielberg.de or https://www.efalia.com

Any updates, fixes or support will be made available on the said web site solely at the discretion of Efalia, who is under no obligation whatsoever so to do.

LIMITED WARRANTY AND DISCLAIMER OF INDEMNITY

Limited Warranty. The Software and documentation is provided "as is" without warranty of any kind, either express or implied, including, but not limited to implied warranties of merchantability and fitness for a particular purpose. The entire risk as to quality and performance of the Software and documentations is with you. Should the Software prove defective you (and not Efalia, Efalia's affiliates, their distributors or dealers) assume the entire cost of all necessary servicing, repair or correction. Some states or jurisdictions no not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary according to state or jurisdiction.

Efalia, Efalia's affiliates, their distributors and dealers do not warrant that the functions contained in the Software will meet your requirements or that the operation of the Software will meet your requirements or that the operation of the Software will be uninterrupted or error free.

However, Efalia or Efalia's affiliates warrants a compact disc or diskette on which the Software is stored to be free from defects in materials and workmanship under normal use for a period of ninety (90) days from the date you purchased the same, as evidenced by a receipt or otherwise. Some states or jurisdictions do not allow limitations on duration of an implied warranty, so the above limitation may not apply to you.

CUSTOMER REMEDIES

Efalia's entire liability and your exclusive remedy shall be the replacement of the Compact Disc and/or Diskette not meeting the LIMITED WARRANTY and which is returned to Efalia or Efalia's marketing affiliate, Efalia Ltd, with a copy of your receipt or otherwise. The LIMITED WARRANTY is void if failure of the Compact Disc has resulted from accident, abuse or misapplication of the software.

No liability for consequential damages. In no event shall Efalia, or Efalia's affiliates, their distributors or dealers be liable for any damages whatsoever (including without limitation, direct or indirect damages for personal injury, loss of business profits, business interruption, loss of business information, or other consequential or incidental damages) arising out of the software, the use thereof or inability to use the software even if Efalia, Efalia's affiliates, their distributors or dealers has been advised of the possibility of such damages. Some states or jurisdictions do not allow the exclusion or limitation of liability for consequential or incidental damages, so the above limitation may not apply to you.

Disclaimer of indemnity. Efalia, Efalia's affiliates, their distributors and dealers shall have no obligation to indemnify you against any claim or suit brought to you by a third party alleging that the Software or the use thereof infringes any intellectual property of such third party.

TERM

This agreement is effective upon the installation of Efalia ECM Server and Client and remains in effect until terminated. You may terminate this agreement by destroying the Software and any copy thereof. This agreement will also terminate if you fail to comply with any of the terms of this agreement. In addition to Efalia enforcing its legal rights, you must then promptly destroy the Software and any copy thereof.

ACKNOWLEDGEMENT

By selecting the 'Yes, I accept the agreement' option during the software installation process, you acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions. You further agree that this agreement is the complete and exclusive statement of agreement between you and Efalia concerning the subject matter hereof, which supersedes any proposals or prior agreements, oral or written, and any other communication between you and Efalia relating to the subject matter hereof. No amendment to this agreement shall be effective unless signed by a duly authorised representative of Efalia.

Should you have any questions concerning this agreement, or if you desire to contact Efalia for any reason, please write to your authorised supplier requesting that they pass your correspondence to Efalia GmbH.

Efalia ECM Dashboard

Overview

Efalia ECM Dashboard is implemented into and directly connected to Efalia ECM WebServer.

It can provide information about utilisations within Efalia ECM BusinessProcessManagement and about values, connected to existing entries in Efalia ECM fields. The information is provided in diagram format, whereas the format and the shown information is adaptable.

Efalia ECM Dashboard offer three types of data sources.

Process overview

This data source contains all processes with the total documents on each process of the specific cabinet.

Process detail view

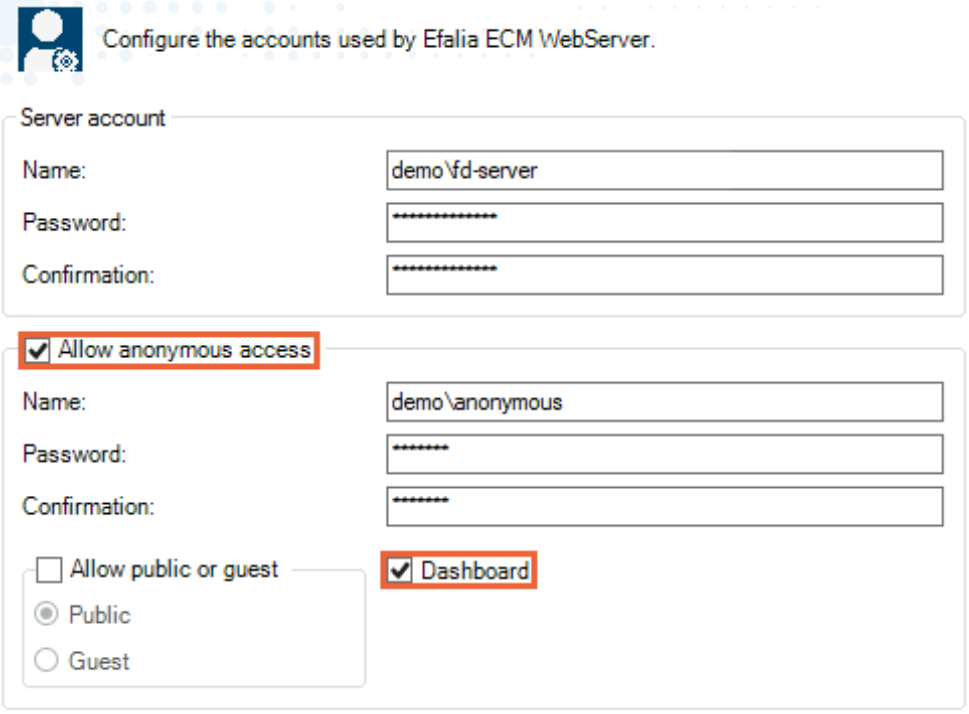

This data source contains all processes with all process steps and the total count of documents for each process step of the specific cabinet.

Document Index Fields

This data source uses information of a specified document type. Compared to the other two sources, this one is not directly linked to user action steps within process management.

Settings in ConfigUtility (Web)

Accounts Tab

Allow anonymous access

The account, given here, is used for one or both of the options ***Allow public or guest*** and ***Dashboard***.

Note

It is strongly recommended that the user account, used for the option **Allow anonymous access**, **is not a member** of the Efalia ECM **fd-admins** group.

Otherwise, the automatic refresh of the Dashboard will not work, due to security reasons.

Dashboard

This checkbox must be ticked. Otherwise, Efalia ECM Dashboard can't use the account, given above, for e.g. automatic refresh of the created Dashboards.

Settings in Enterprise Manager

The node Dashboard in Efalia ECM Enterprise Manager provides the ***Settings*** for the Efalia ECM Dashboard. These settings contain of two tabs, ***Settings*** and ***Data sources***.

The Dashboard node can be found within each cabinet and the settings are valid for all corresponding dashboards of the respective cabinet.

Tab: Settings

Within this tab, timer values and font sizes can be set.

Note

These settings are valid for all dashboards of the respective cabinet.

Timer

Data refresh (min)

The Efalia ECM Dashboard updates the data according to the interval set ***Efalia ECM Enterprise Manager*** for the corresponding cabinet.

The ***default*** value is ***20 minutes***.

Note

The minimum value here is **5** minutes and the maximum value **60** minutes.

If the website is updated or reloaded, using F5, the data source will not be updated.

The data is only being updated according to the interval value set in the Efalia ECM Enterprise Manager.

Tab page switch (min)

The ***Tab page switch*** option defines the change interval in minutes for tab containers.

The minimum value is ***1*** minute and the maximum value is ***20*** minutes.

The default value is ***5*** minutes.

> **Note**
>
> These values are global values and valid for all created dashboards and diagrams of the corresponding cabinet.
>
> The set interval is only applied when the display mode (View) is used.

Font size

The section ***Font size*** within the ***Settings*** allows to change the size of the used font for different sections of the Dashboard.

The values selected in this area are global and will be applied to all dashboards and charts created.

Title

Dashboard

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

> **Note**
>
> The maximum value is **35** pt.

Toolbar

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Diagram

Chart

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Pie

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Grid

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Treemap

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Pivot

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Gauge

The default value is ***13*** pt.

The value can be altered by using  on the right hand side.

Note

The maximum value is **35** pt.

Tab: Data sources

This tab provides the additional settings for the data sources ***Document index field*** and ***Process detail view***, which, unlike the data source ***Process overview***, can be combined with Efalia ECM fields.

The drop-down menu ***Data source*** shows the two internal sources ***Document index field*** and ***Process detail view***.

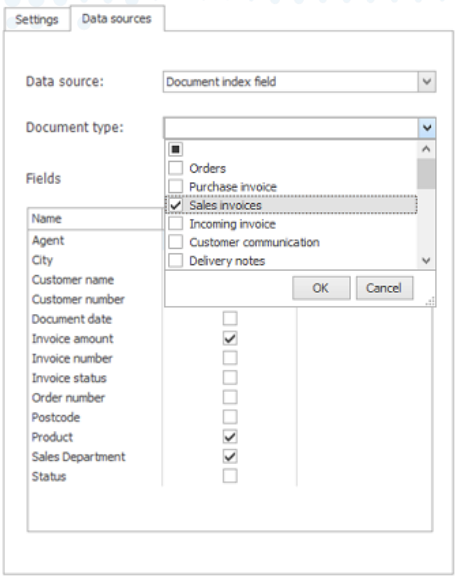

The drop-down menu ***Document type*** shows the available document types of the corresponding cabinet.

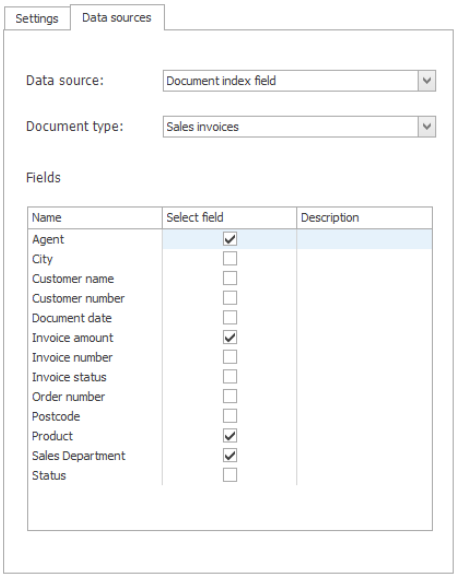

Multiple document types can be selected.

Note

These settings are valid for all dashboards of the respective cabinet.

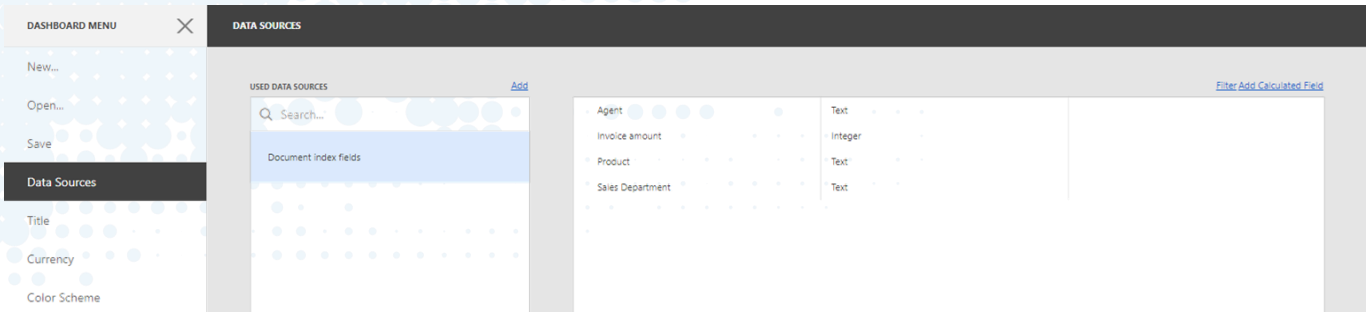

Example

In this example, only the document type ***Sales invoices*** and the following fields of this document type are selected for the use in Efalia ECM Dashboard, in combination with the data source ***Document index field***:

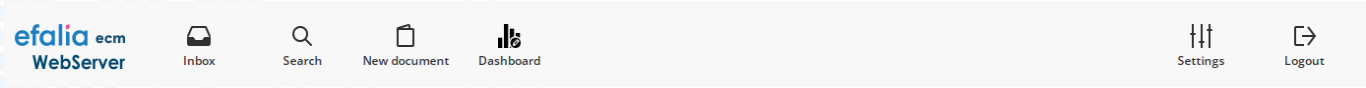

- Agent
- Invoice amount
- Product
- Sales Department

Storage location of Dashboard Settings

The settings of Efalia ECM Dashboards are stored within the ***dbo.settings*** of the corresponding cabinet's database.

Dashboard Desktop

The Dashboard button is only visible but disabled for all users of Efalia ECM WebServer. At least one of the following rights on cabinet level is needed to access Efalia ECM Dashboard, in view or edit mode:

Dasboard View

Dashboard Edit

The button is enabled after selecting either the area ***Inbox***, ***Search*** or ***New Document***.

Please check ***Efalia ECM Enterprise Manager Guide*** ⇨ ***Cabinet Security*** for further information.

Open Efalia ECM Dashboard

There are two ways to open Efalia ECM Dashboard, either using the URL or the Dashboard icon of Efalia ECM WebServer.

Note

Using a URL is not available for Efalia ECM Cloud.

URL

Efalia ECM Dashboard can be opened directly in Edit mode or Show mode, using a URL.

Example

URL for edit mode

(without specifying a dashboard)

http(s)://myDomain/myServer/web/dashboard/edit?cabinetID=MyCabinetID

If a specific dashboard is to be opened directly, the URL from the example above can be extended to include the name of the dashboard.

The name of the dashboard is entered here, including any spaces.

Example

URL for edit mode

(with specifying a dashboard)

http(s)://myDomain/myServer/web/dashboard/edit?cabinetID=MyCabinetID&dashboard=My Dashboard

Note

The following right on cabinet level is needed: **Dashboard Edit**.

Example

URL for show mode

(without specifying a dashboard)

http(s)://myDomain/myServer/web/dashboard/show?cabinetID=MyCabinetID

If a specific dashboard is to be opened directly, the URL from the example above can be extended to include the name of the dashboard.

The name of the dashboard is entered here, including any spaces.

Example

URL for show mode

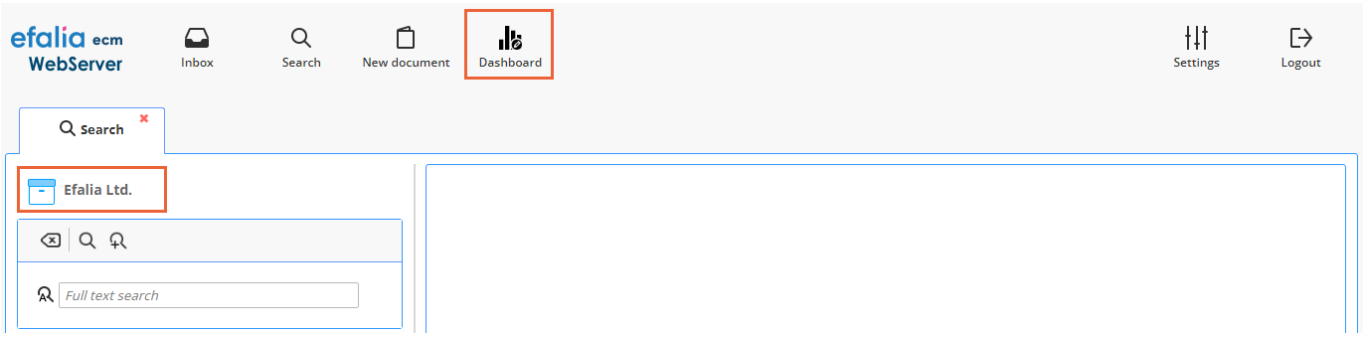

(with specifying a dashboard)

http(s)://myDomain/myServer/web/dashboard/show?cabinetID=MyCabinetID&dashboard=My Dashboard

Note

The following right on cabinet level is needed: **Dashboard View**.

Efalia ECM WebServer

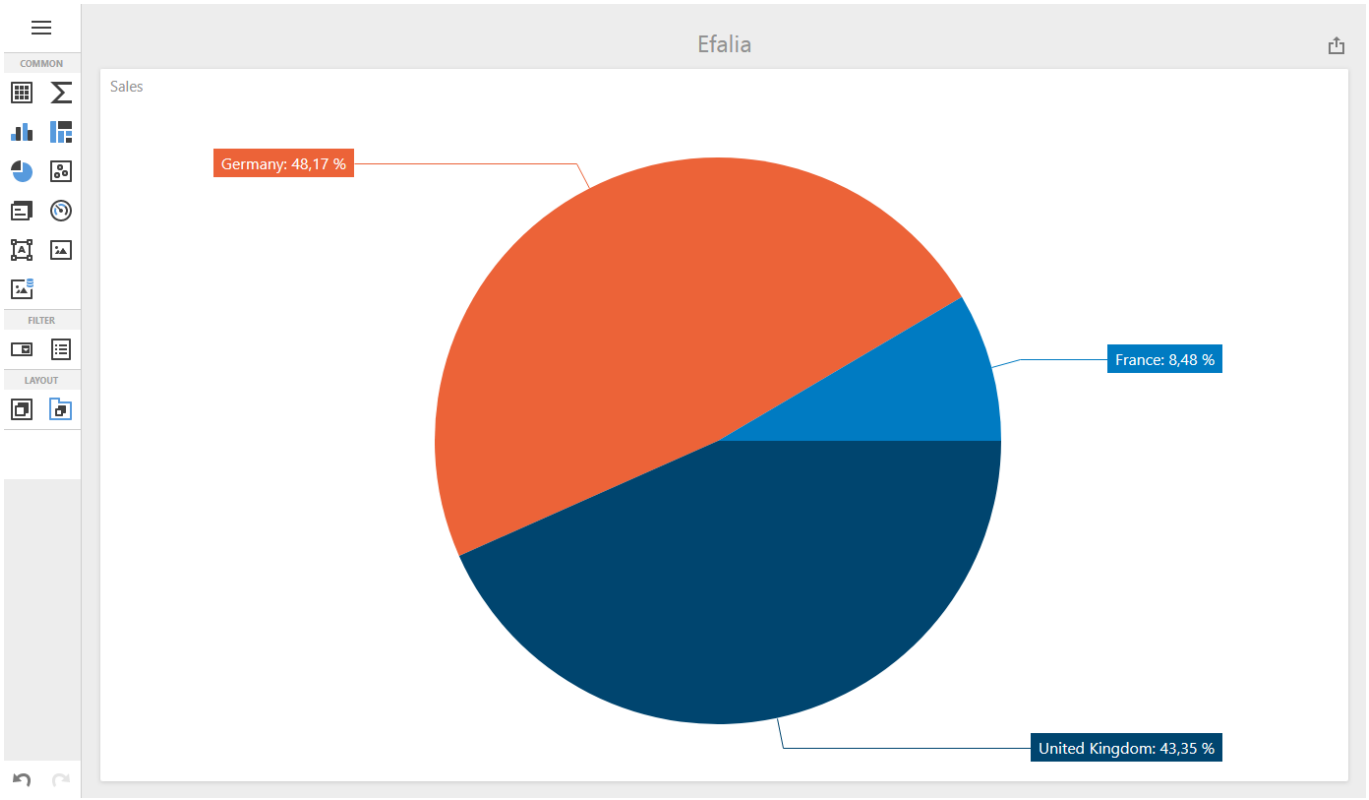

After selecting an area and the selection of a corresponding cabinet, the fields are listed within the tab and the ***Dashboard*** button becomes enabled.

Note

The content, displayed in Efalia ECM Dashboard, is directly linked to the selected cabinet of the active work area. The three different areas are **Inbox**, **Search** and **New Document**.

Admin Desktop/Edit Mode

In default, Efalia ECM Dashboard desktop shows the control box on the left hand side and the tabs ***Processes overview*** and ***Process detail view*** within the large area, next to the ***Control box***.

Create a Dashboard

Types of Data Sources

There are ***three*** types of data sources – ***Process overview***, ***Process detail view*** and ***Document Index Fields***.

Process overview

This data source contains all processes with the total documents on each process of the specific cabinet.

Process detail view

This data source contains all processes with all process steps and the total count of documents for each process step of the specific cabinet.

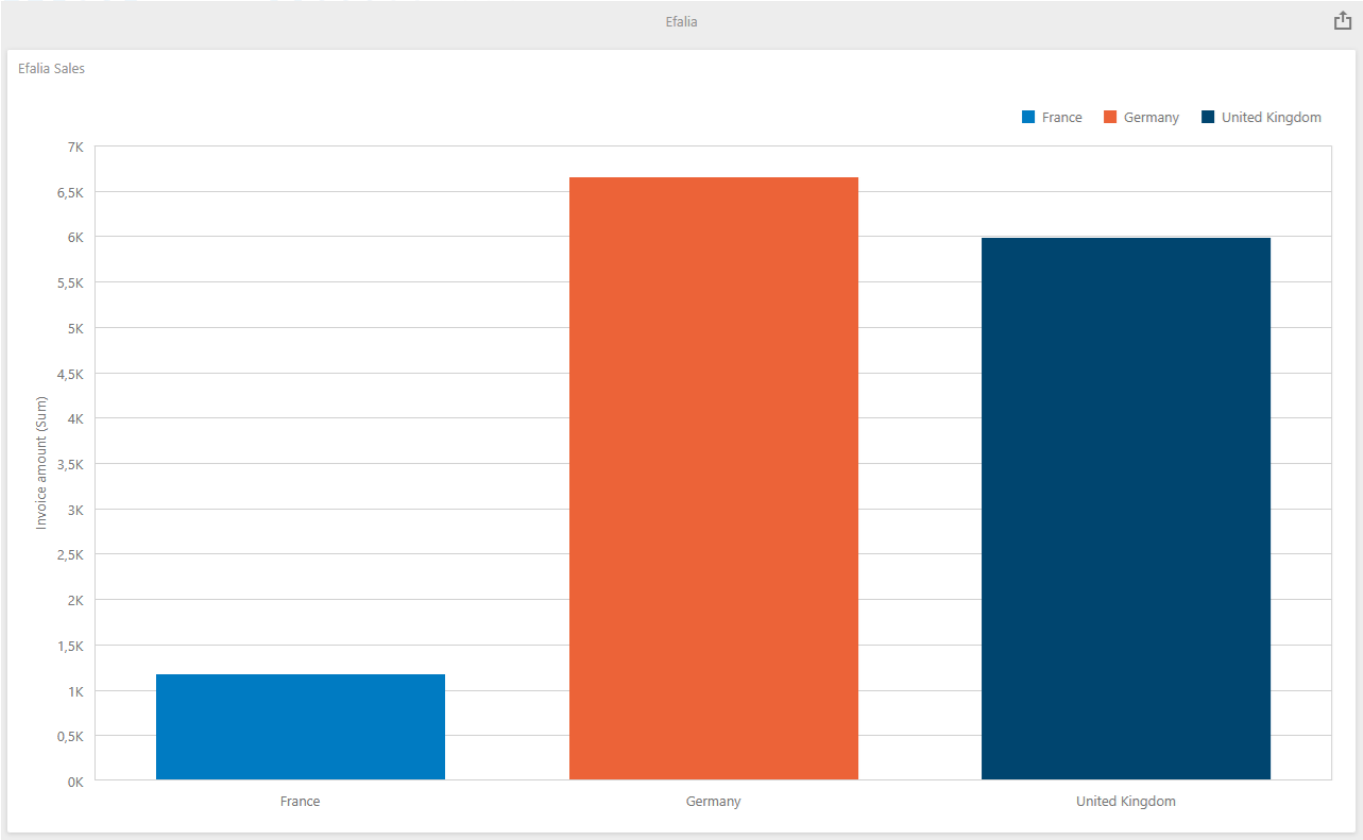

Document Index Fields

This data source uses information of a specified document type. Compared to the other two sources, this one is not directly linked to user action steps within process management.

Diagram Axis

In diagram types with ***x-axis*** and ***y-axis***, the setting Arguments defines the ***x-axis*** and the Values setting defines the ***y-axis***.

Example

The ***x-axis*** shows the different ***Sales Departments***.

The ***y-axis*** shows the ***Invoice amount (sum).***

Colouring Arguments

Options

Coloring

Efalia ECM Dashboard allows to allocate an individual colour scheme to diagrams.

This option must be enabled manually.

1. Select the diagram.
2. Go to ***Options*** on the left-hand side of the diagram.
3. Select ***Coloring***.
4. Set ***Arguments – XXX*** to ***On***.
5. Now, open the ***Dashboard menu*** and select ***Color Scheme***.
6. Set the element to the preferred colour, using ***Hex values***.

Dashboard menu

The Dashboard menu provides options e.g. for creating new dashboards, saving changes in existing dashboards or editing the colour scheme.

New…

After selecting ***New…***, a unique and descriptive name should be provided in the section ***Dashboard Name*** and one of the two data sources must be selected. This can be either ***Processes overview***, ***Process detail view*** or ***Document Index Fields***.

The examples given below, add ***Process overview*** for ***Used Data Sources***.

The other data source can be selected and added later on.

Note

The name of an Efalia ECM Dashboard must be unique. Otherwise, the new Dashboard cannot be created.

Create a diagram

Efalia ECM Dashboard provides multiple types of diagrams. These are shown in the ***Common*** section of the Dashboard menu.

Grid	Pivot	Chart
Treemap	Pies	Scatter chart
Cards	Gauges	Text box
Bound image		

Choose one of the types, shown above by dragging it from the tool box to the dashboard area.

New Efalia ECM Dashboards open blank and must be configured after creation.

Binding

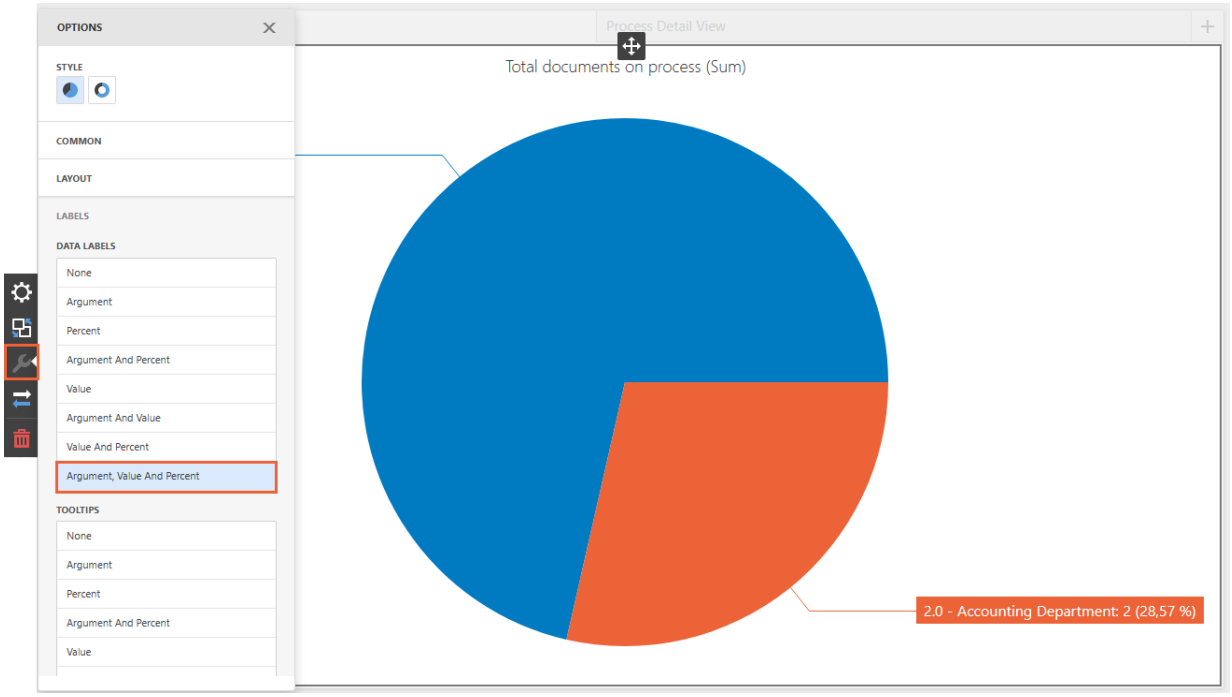

These configurations can be done through the option menu on the left-hand side of the new diagram.

The first step is the setup of the arguments and configuration of the corresponding parameters. This is done within the menu ***Binding***.

Example

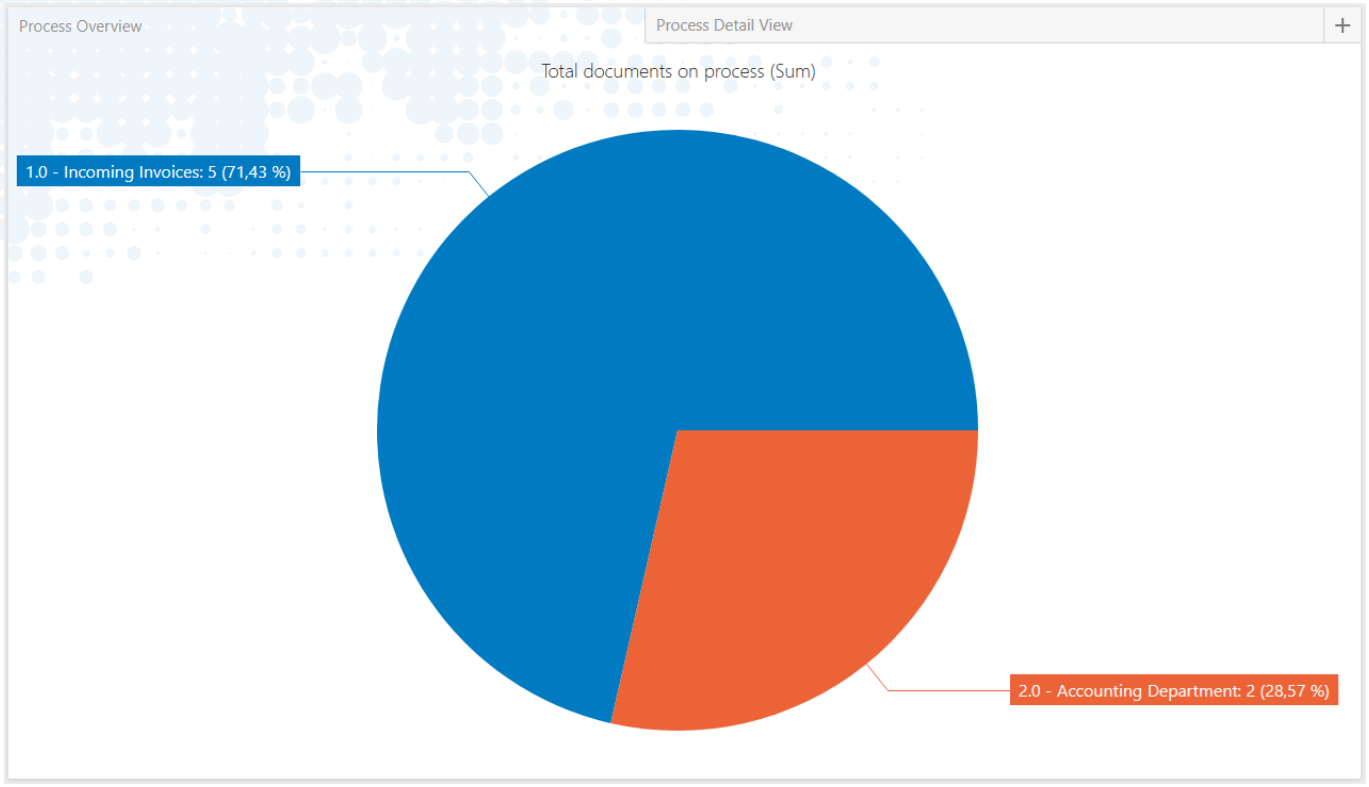

1. Select ***Chart*** from the ***Common*** section.
2. Go to ***Binding*** on the left-hand side of the selected chart diagram.
3. Start with the definition of the arguments and select ***Add Argument***.
4. Within the extended menu, now opening to the right, select ***Process name*** for this example.
    a. This argument is being used for the X-axis of this chart diagram.
5. After selecting an Argument, go to ***Add Values*** and choose, in this example, ***Total documents on process***.
    a. This argument is being used for the Y-axis of this chart diagram.
6. In this example, the ***Labels*** are set to ***Argument, Value and Percent***, to show the actual number of documents and the corresponding value in percent.

    This setting can be done under ***Options***.

As soon as documents hit ***User action*** process steps, the counters of the diagram start to change.

Based on this example, the diagram will show all processes and the total count of documents on each process.

Two data sources in a single dashboard

Both data sources can be used with a single dashboard.

Example

1. Go to the ***Dashboard menu*** on the top left side.
2. Select ***Data Sources*** from the unfolding menu.
3. The left column shows ***Used Data Sources***. Select ***Add*** and the the data source you want to add from pop-up window.
    a. As ***Process overview*** has already been selected when creating the dashboard, in this example, only ***Process detail view*** and ***Document index fields*** would be available to add.

    For this example, please select ***Process detail view***.
4. Close the ***Dashboard menu*** and go back to the diagram.
5. Go to ***Binding*** on the left-hand side of the selected chart diagram.
6. Select Data/Filtering and click on the preferred data source.

7. Confirm the selection with OK.

Note

Changing the data source will remove all previously set arguments and values.

Display a single process

Filtering Data Sources

Data sources can be filtered.

Note

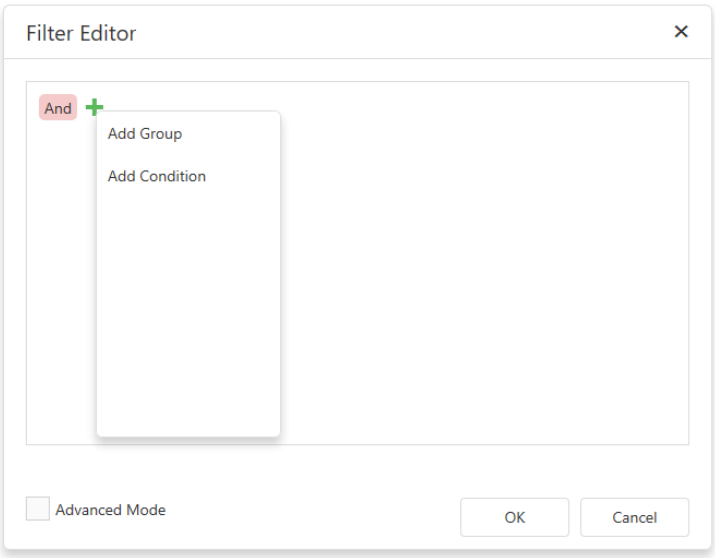

These filter settings are global for all diagrams of a dashboard.

Example

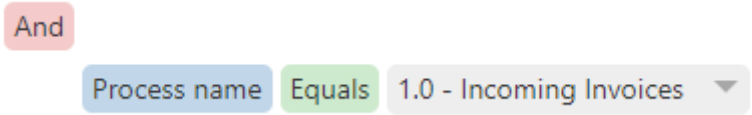

1. Click on the diagram area and select ***Binding***, shown on the right hand side of the diagram.
2. Select ***Data/Filtering***.

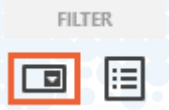

3. Click on ***Click to set Filter Criteria***.
    a. The Filter Editor opens in a separate window.
    b. Now, hover over And and a green + icon appears.

4. Select ***Add Condition***.
5. The example of a filter, given below, will only show the process 1.0 Incoming Invoices.
    a.

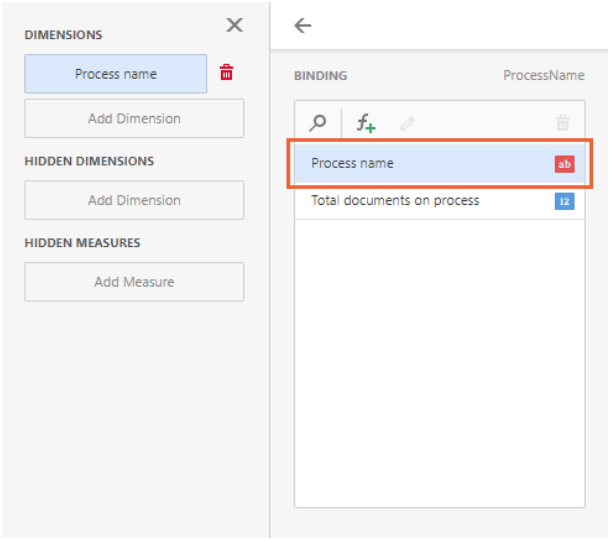

Filtering using the Combo Box

The ***Dashboard toolbar*** area ***Filter*** offers a ***Combo Box*** option.

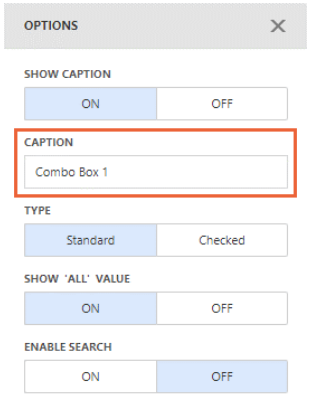

This option allows a variable filter, which can be selected from a drop-down menu.

1. Select from the Dashboard toolbar ***Filter*** ⇨ ***Combo Box***.
    a. The ***Combo Box*** is shown below the diagram.
2. Select ***Binding*** from the control of the ***Combo Box***.
3. Under "***Dimensions***" click "***Add Dimension***"
4. Select the filter for example "***ProcessName***"

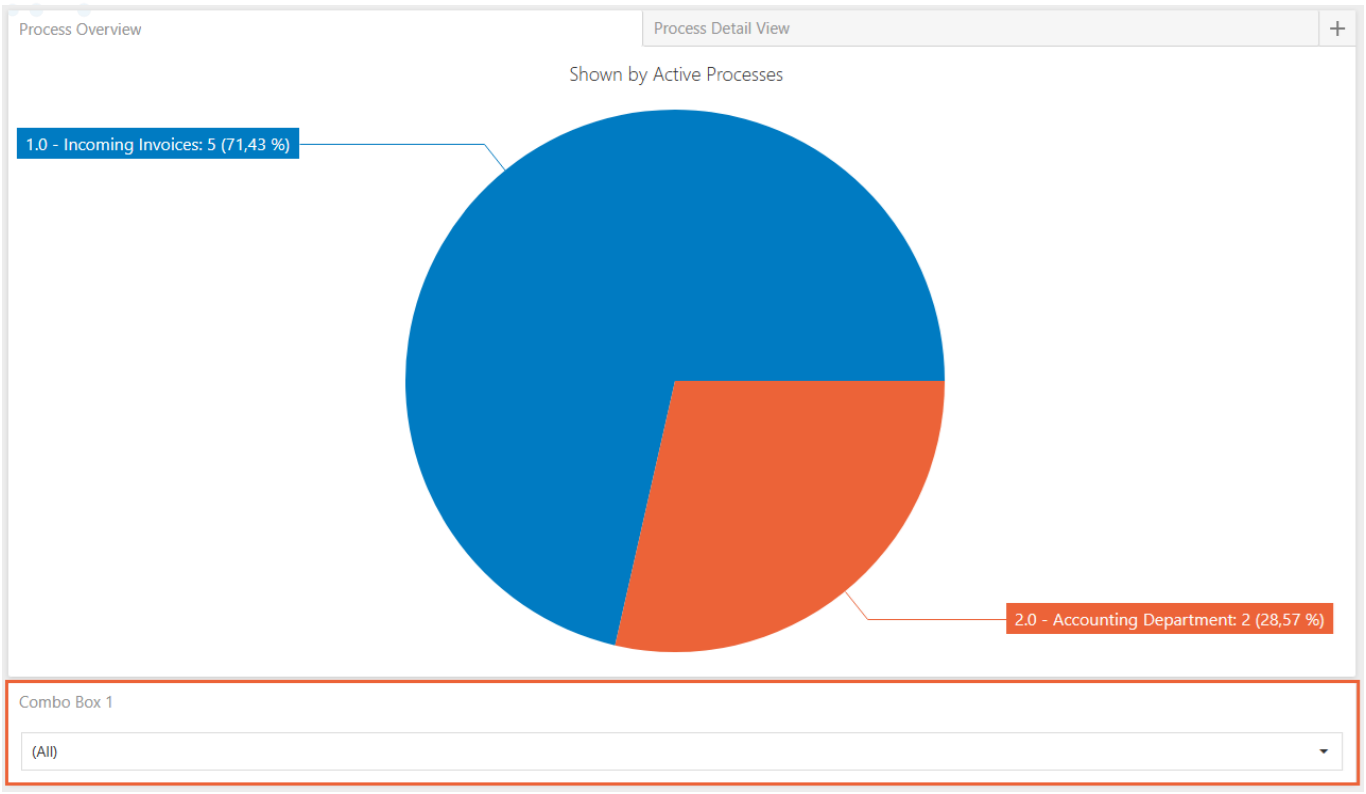

This allows a user of Efalia ECM Dashboard to filter the information by process name, using a drop-down list.

The default name of this element is ***Combo Box 1*** and can be altered into a more descriptive name in ***Options*** ⇨ ***Caption***.

Example

Process Overview
Process Detail View
Shown by Active Processes
1.0 - Incoming Invoices: 5 (71,43 %)
2.0 - Accounting Department: 2 (28,57 %)
Combo Box 1
(All)

Layout

Efalia ECM Dashboard offers two layout options. These options do not differ if only a single diagram is displayed. As soon as two or more diagrams are to be displayed in a single dashboard, the layout, selected at the beginning of the design process, is important.

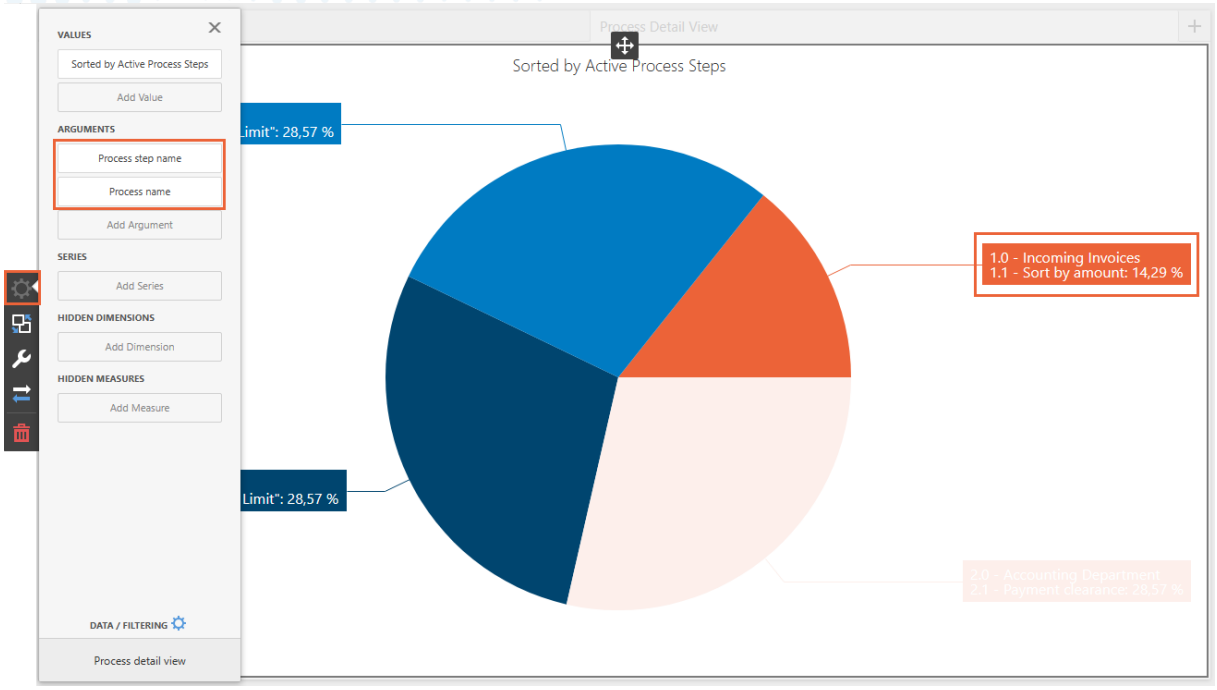

Note

Even though, the selected diagram type can be converted and altered at a later stage, the selected layout option cannot.

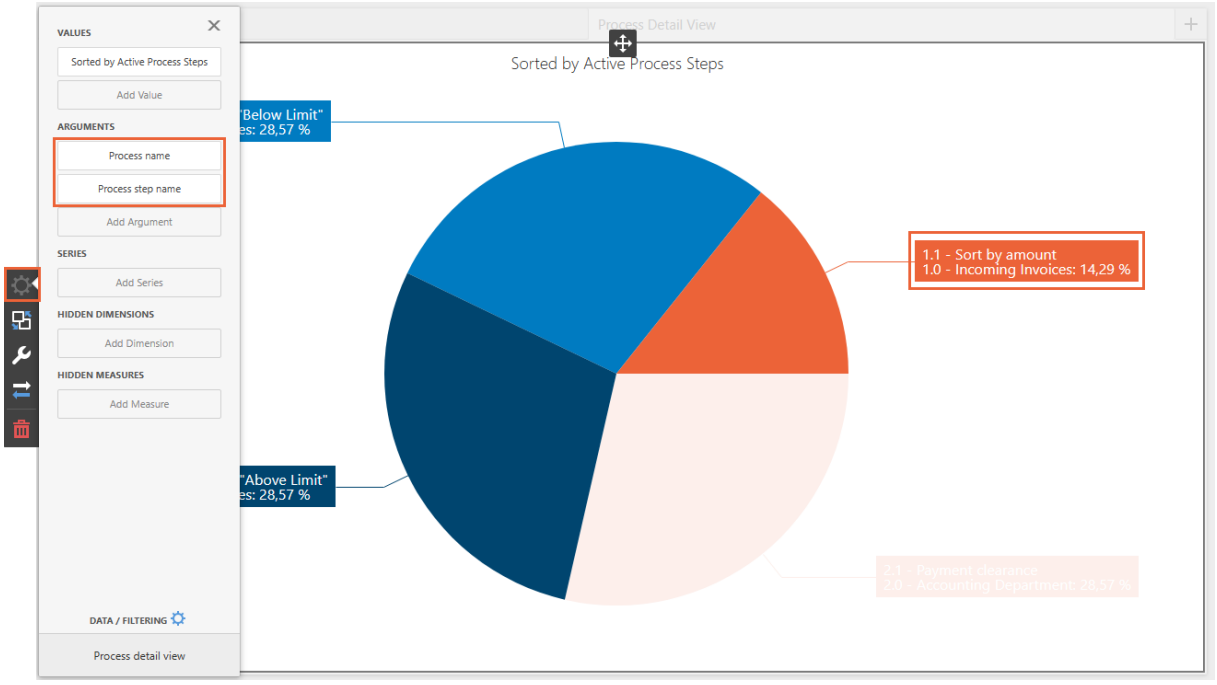

Order of Arguments

The order of the arguments, shown within a label of a diagram depends on the order, the arguments have been added to the ***Bindings***.

Example

VALUES
Sorted by Active Process Steps
Add Value
ARGUMENTS
Process step name
Process name
Add Argument
SERIES
Add Series
HIDDEN DIMENSIONS
Add Dimension
HIDDEN MEASURES

1.0 - Incoming Invoices: 14,29 %
"Above Limit"
es: 28,57 %

Group

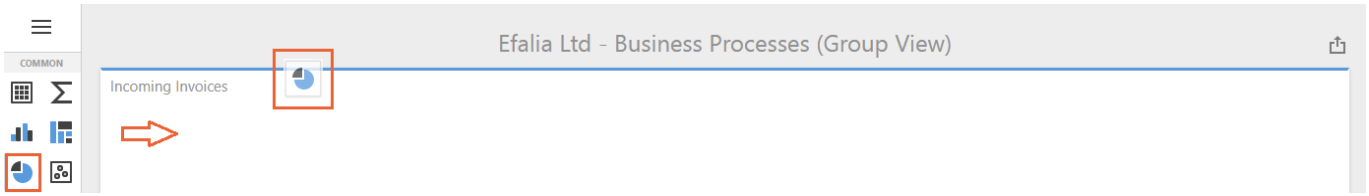

The option ***Group*** shows multiple diagrams of the same dashboard simultaneously.

Add a diagram

If an addition diagram is needed at a later stage, it will be added by a simple drag&drop action.

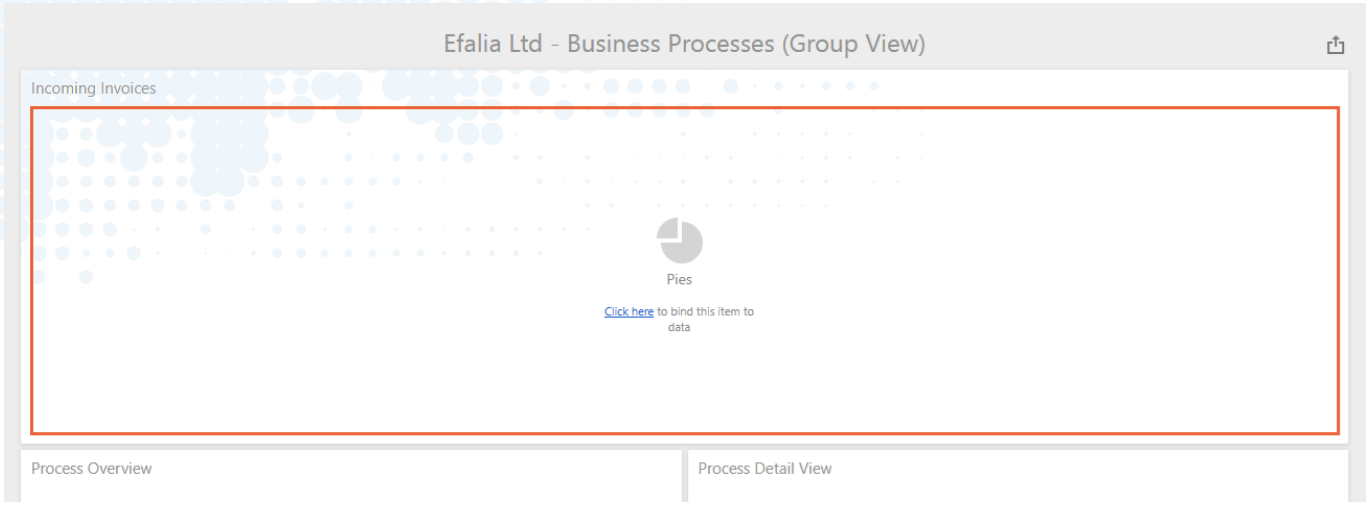

Select a diagram from the ***Common*** section and drag it on the existing group. A horizontal line will appear and the additional diagram can be placed.

Example

Note

See the light blue horizontal line above the two existing diagrams **Process Overview** and **Process Detail view**.

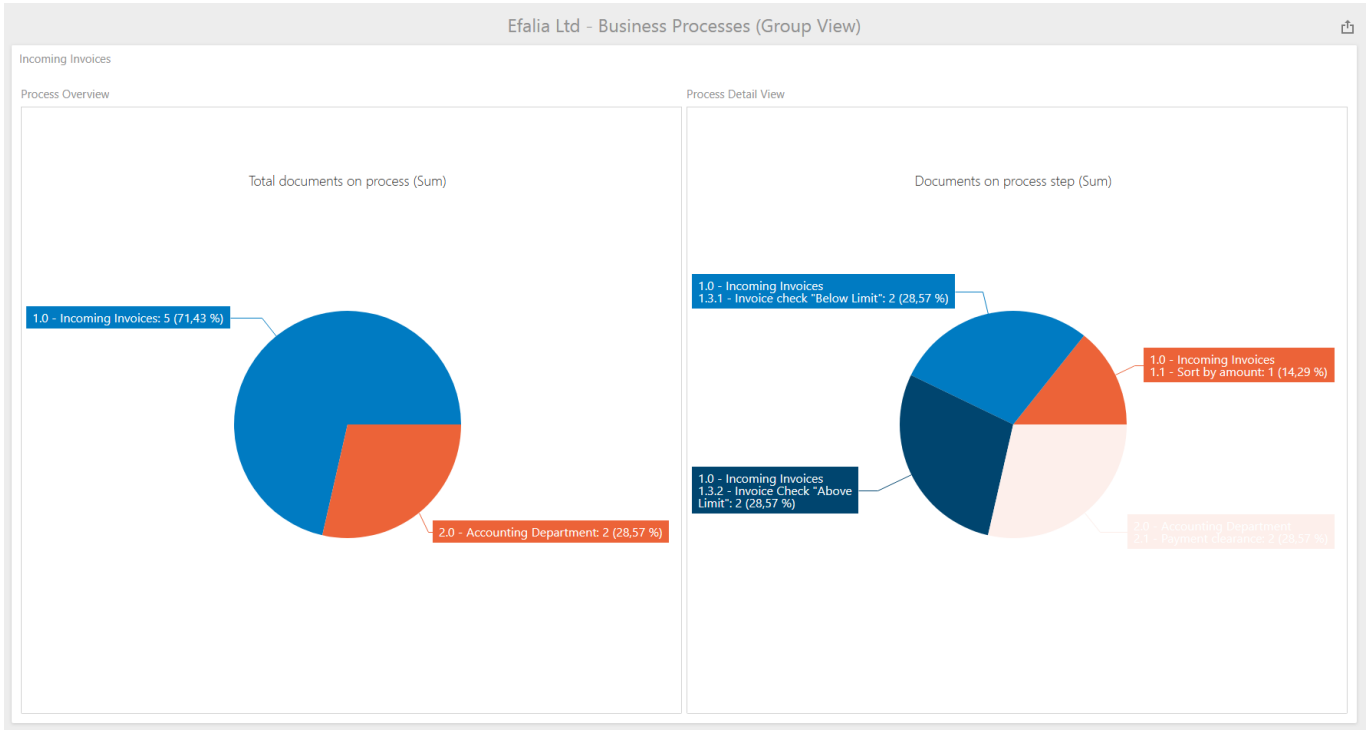

In this example, the new diagram was placed above the two existing diagrams.

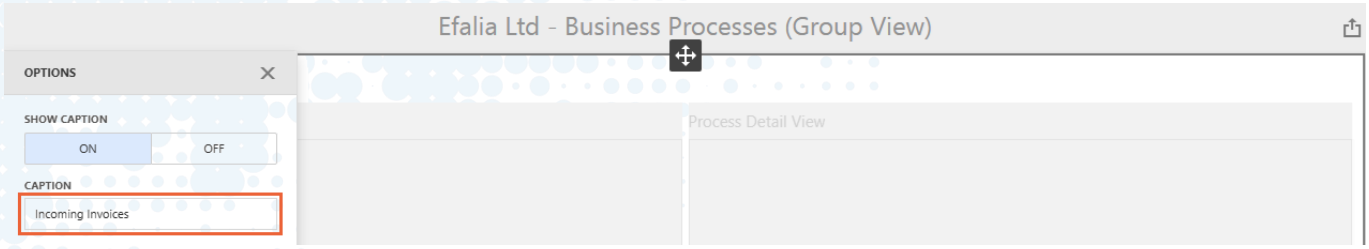

The final position of the diagram can be changed afterwards.

Result

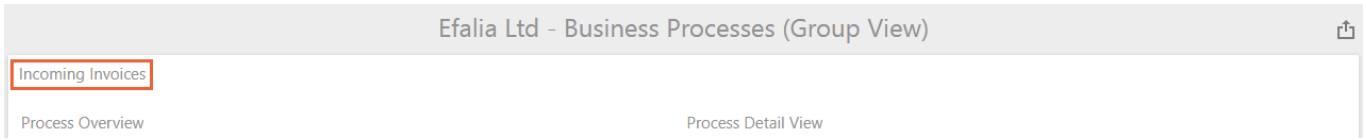

The selected diagram format is ***Pies***.

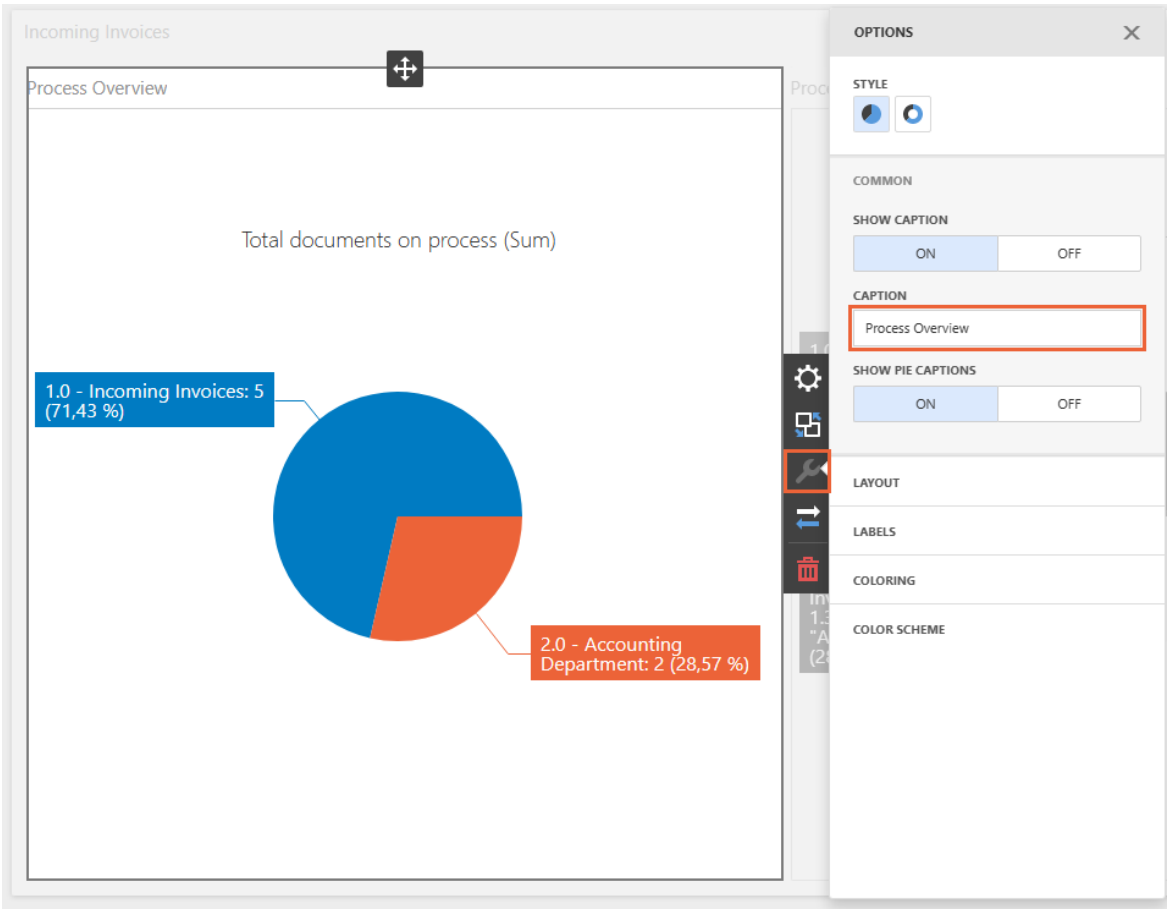

Within the ***Options*** menu of the group, the group was renamed from ***Group 1*** to ***Incoming Invoices***:

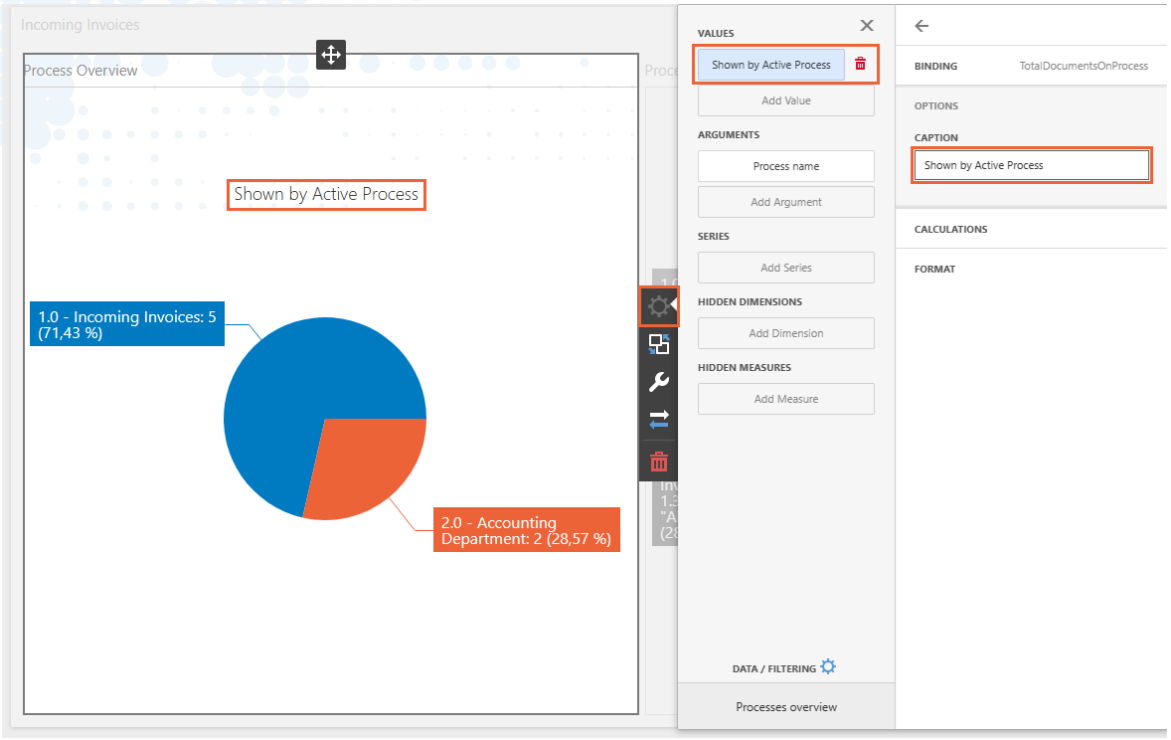

Result

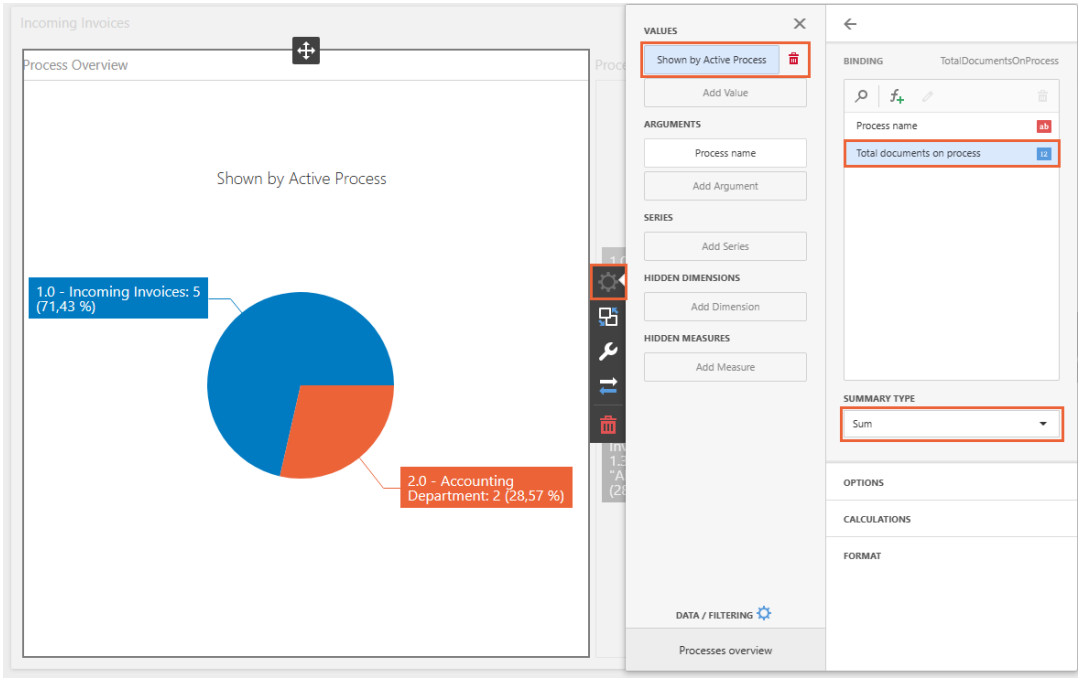

1. The diagram on the left-hand side was renamed to ***Process Overview***.

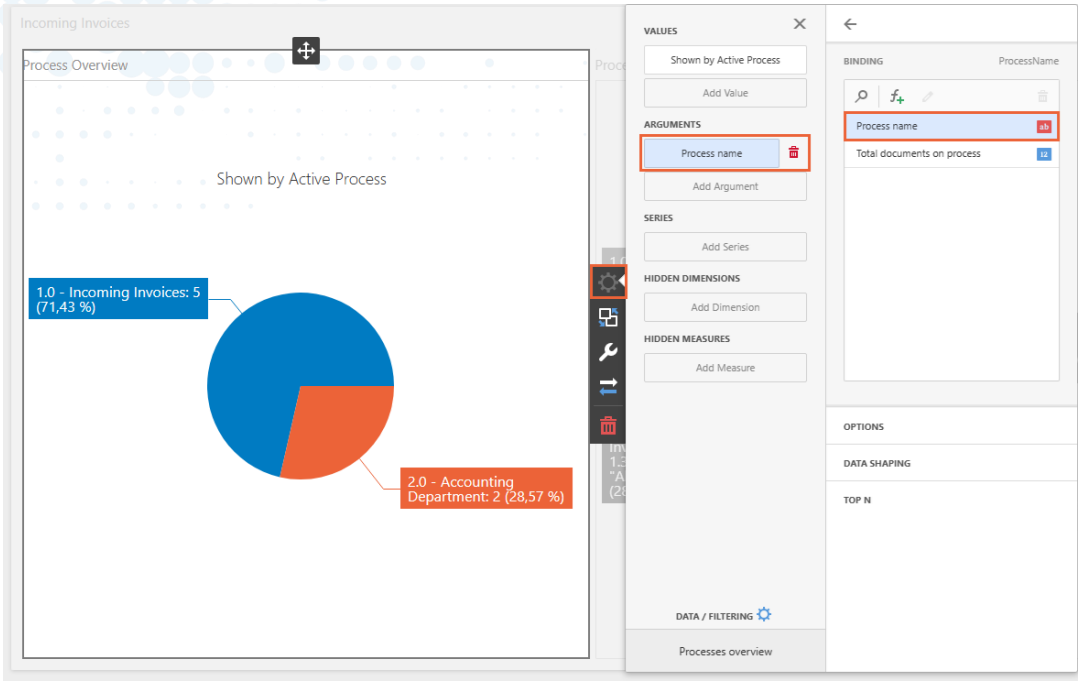

2. The ***Caption*** was changed from ***Total documents on process*** to ***Shown by Active Processes***.

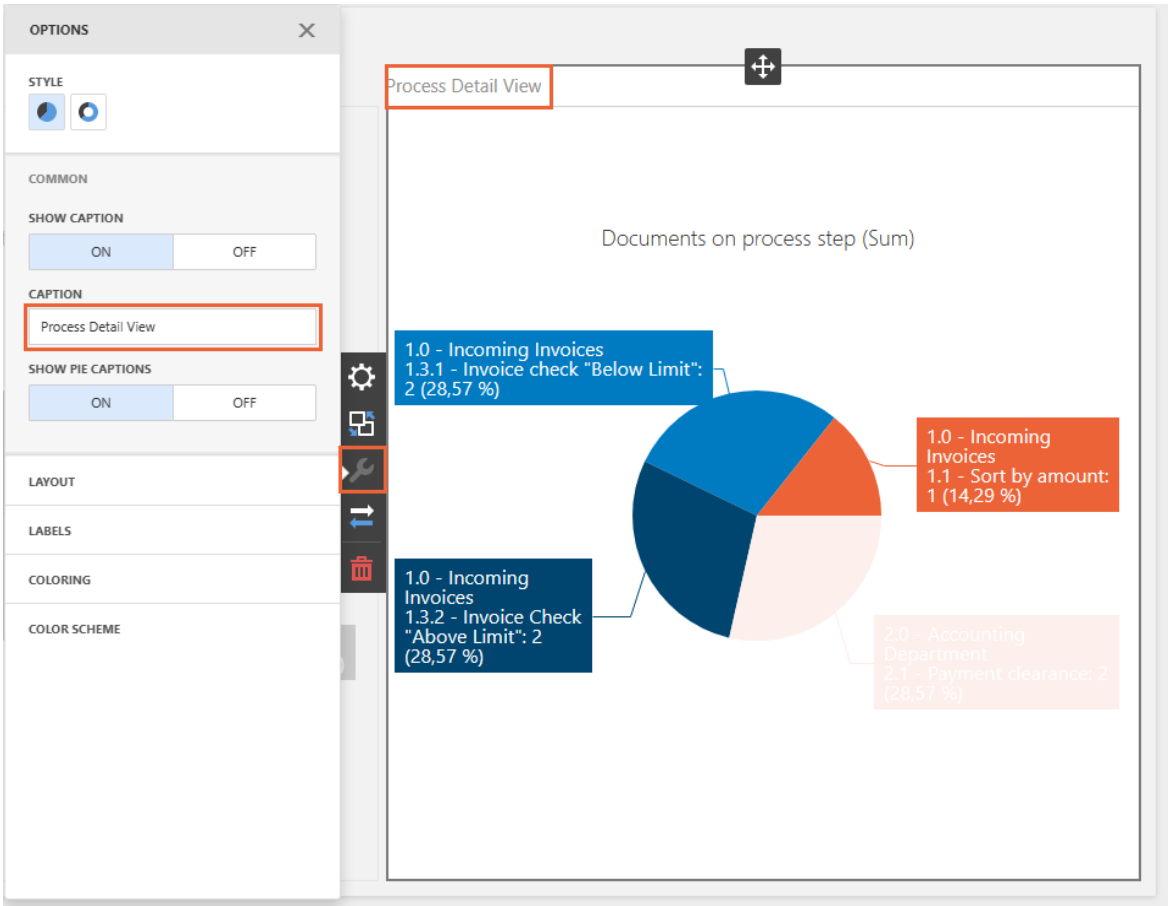

3. The following ***Bindings*** were made:
    a. ***Values*** was set to ***Total documents on process***, using ***Add value*** and the ***Summary type*** was set to ***Sum***.

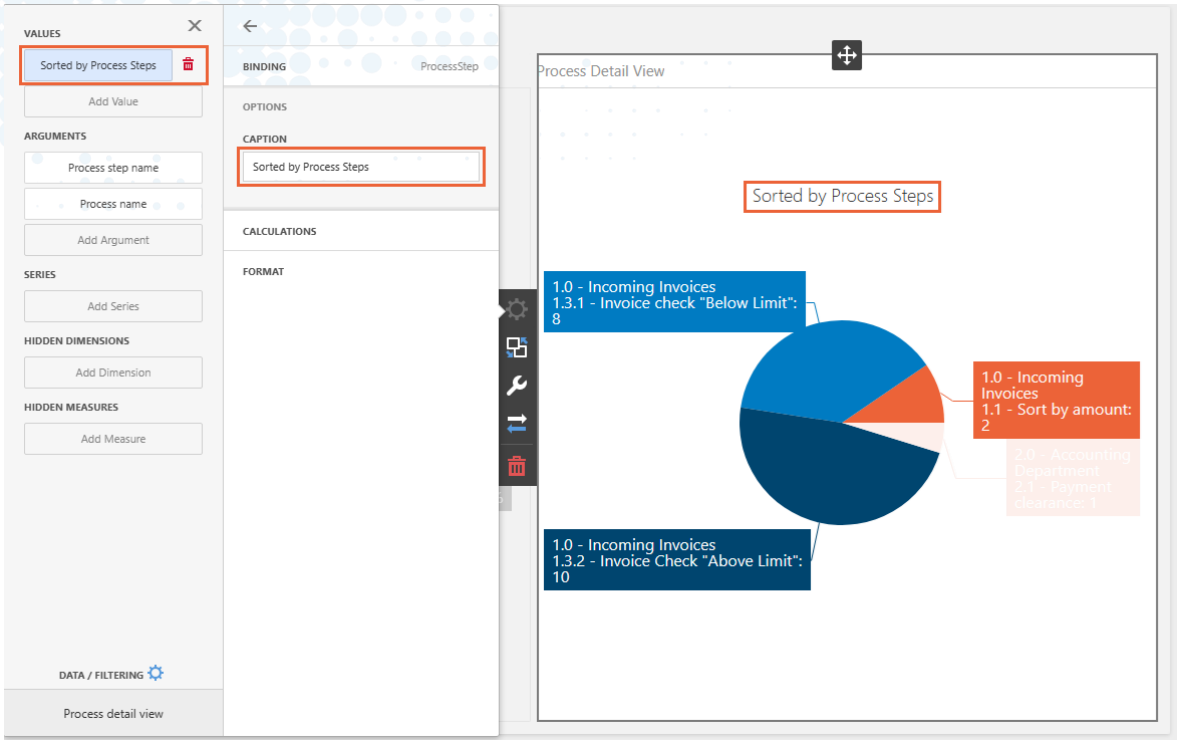

b. ***Arguments*** was set to ***Process name***, using ***Add Argument***.

1. The diagram on the right-hand side was renamed to ***Process Detail View***.

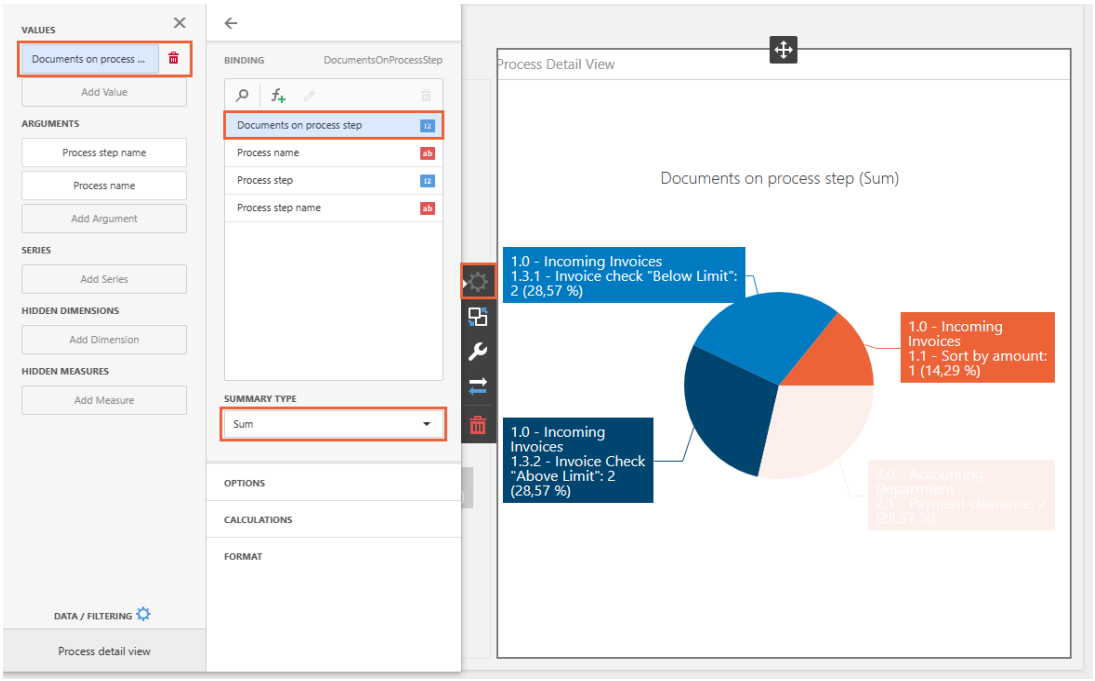

2. The ***Caption*** was changed from ***Documents on process step*** to ***Sorted by Process Steps***.

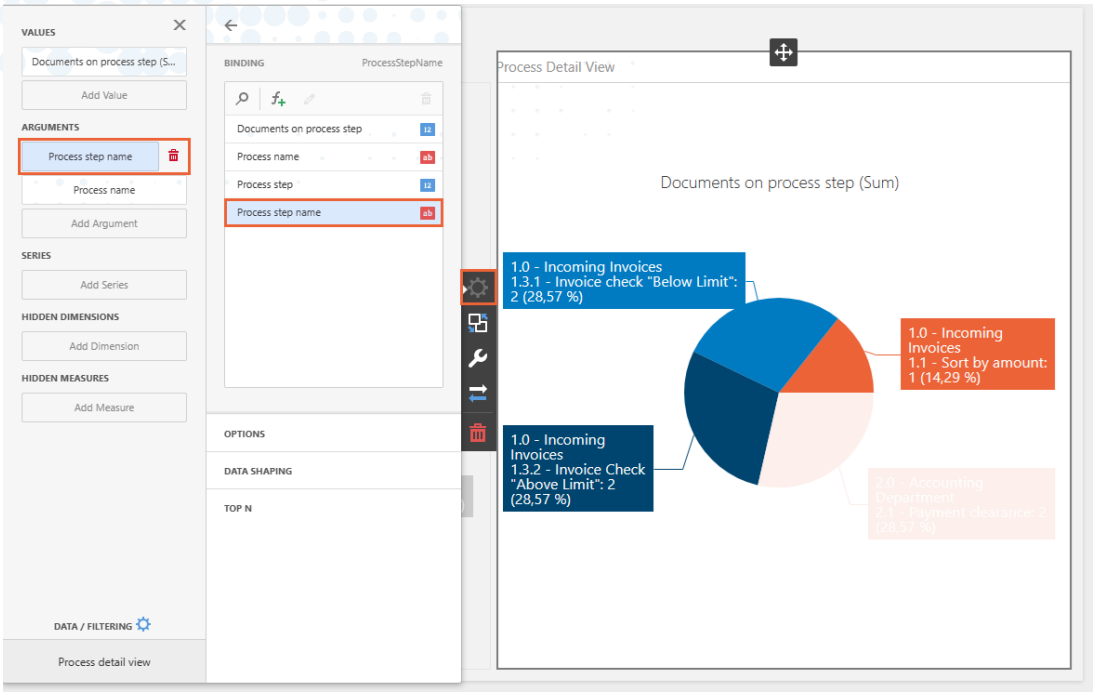

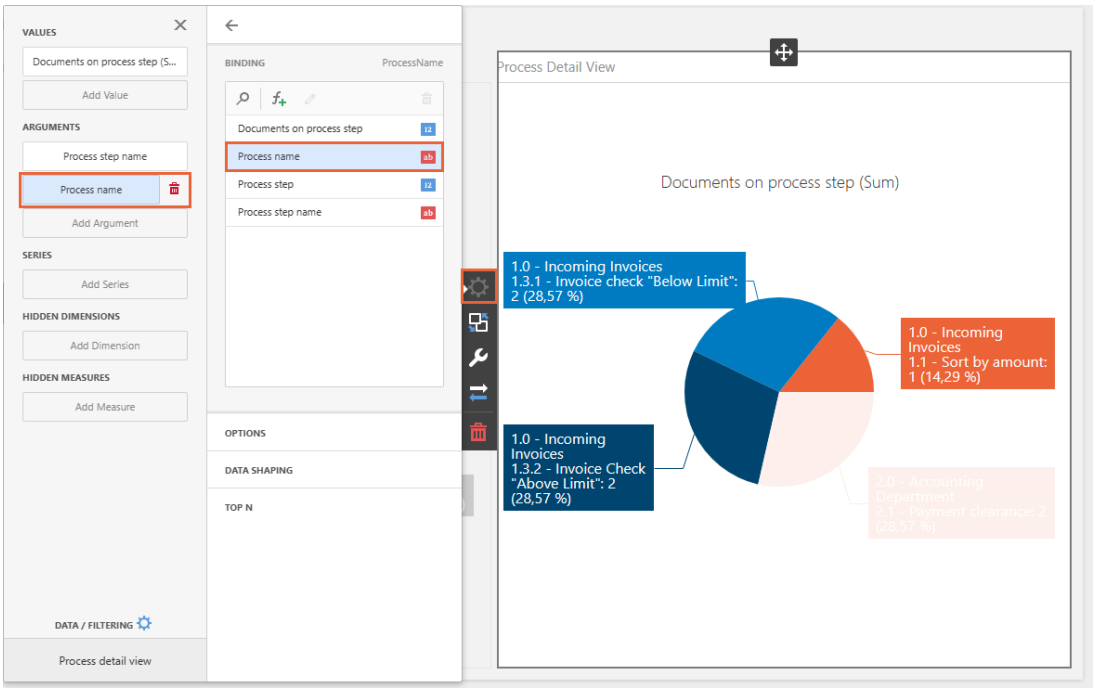

3. The following ***Bindings*** were made:

   a. ***Values*** was set to ***Documents on process step***, using ***Add value*** and the ***Summary Type*** was set to ***Sum***.

b. ***Arguments*** was set to ***Process step name*** and ***Process name***, using ***Add Argument***.

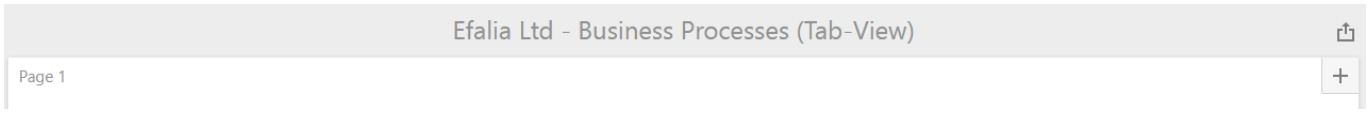

Tab container

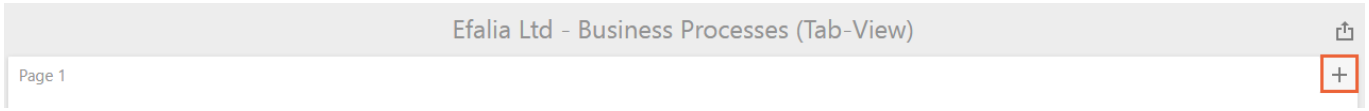

The option ***Tab Container*** shows one diagram per tab at a time. The tabs are automatically flicked through, according to the ***Tab page switch (min)*** setting in Efalia ECM Enterprise Manager.

The default layout of Tab container consist of a single tab, labelled Page 1.

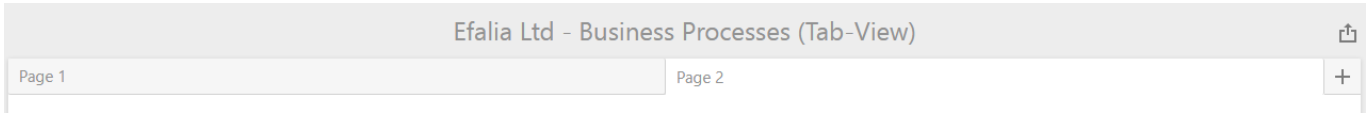

Add a tab

If an additional diagram is needed at a later stage, it can be added by the **+** at the right hand side of the existing tabs.

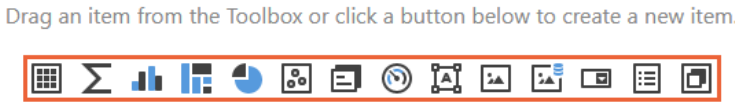

The new tab will be added after the existing tabs. The default ***Caption*** is ***Page #*** and can be changed.

Add a diagram

At the beginning, these pages are empty and the required diagram type must be selected.

The quickest way is to select a type from the icons shown in the centre of the page.

If an additional diagram is needed at a later stage, it will be added by a simple drag&drop action.

Select a diagram from the ***Common*** section and drag it on the existing group. A horizontal or vertical line will appear and the additional diagram can be placed within an existing tab.

Change Order/Delete Tabs

The order of the tabs within a container can be changed quickly.

Simply open ***Options*** of the container and change the order by using the ***Up*** and ***Down*** icons. The icons appear when the mouse pointer is moved to this area.

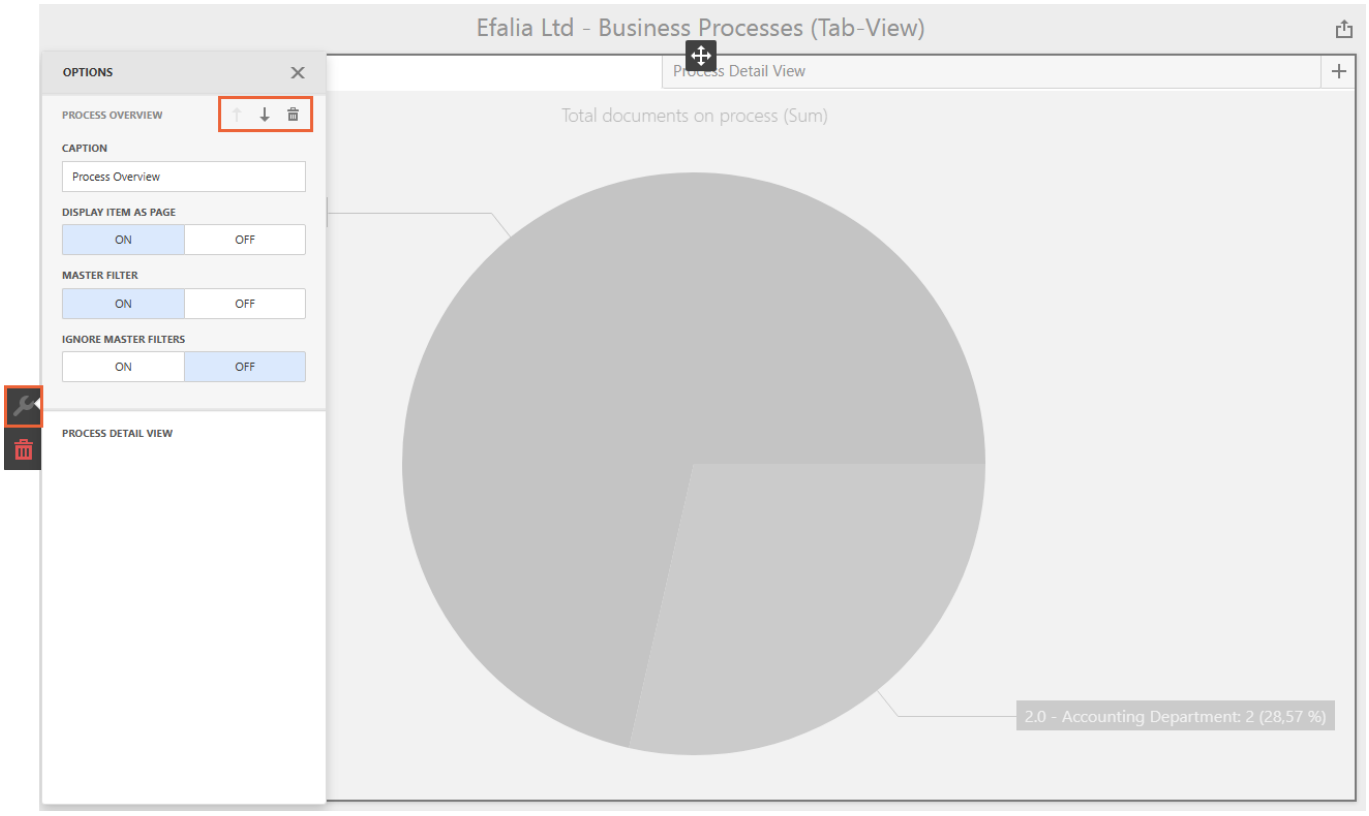

Quite similar, existing tabs can be deleted.

Simply open ***Options*** of the container and move the mouse pointer to this area and the Delete icon will appear.

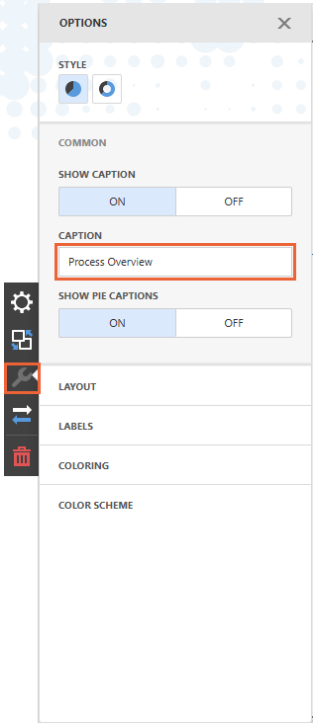

Important

After clicking on **Delete**, the tab is being deleted without any additional warning.

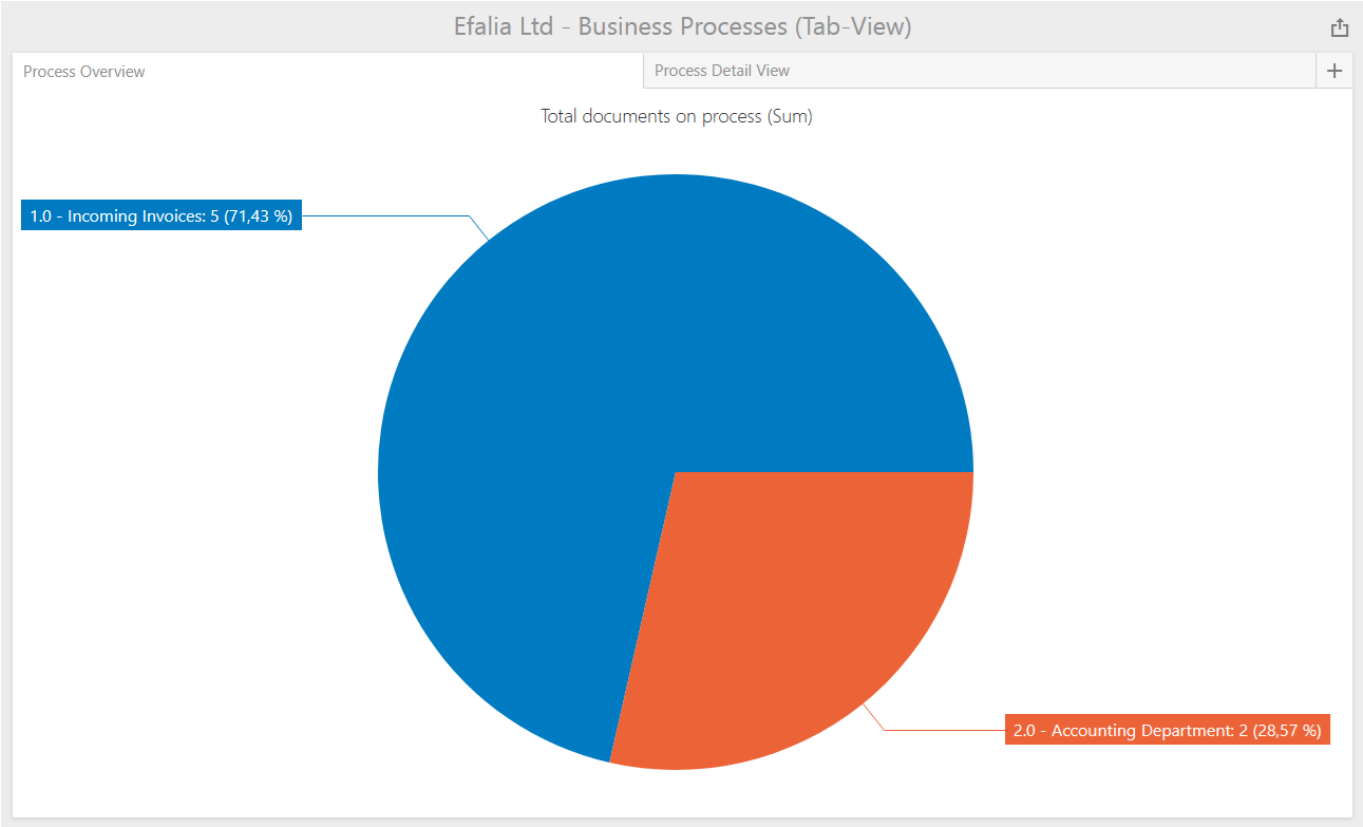

Page Labels

Klick on the diagram and select ***Options***.

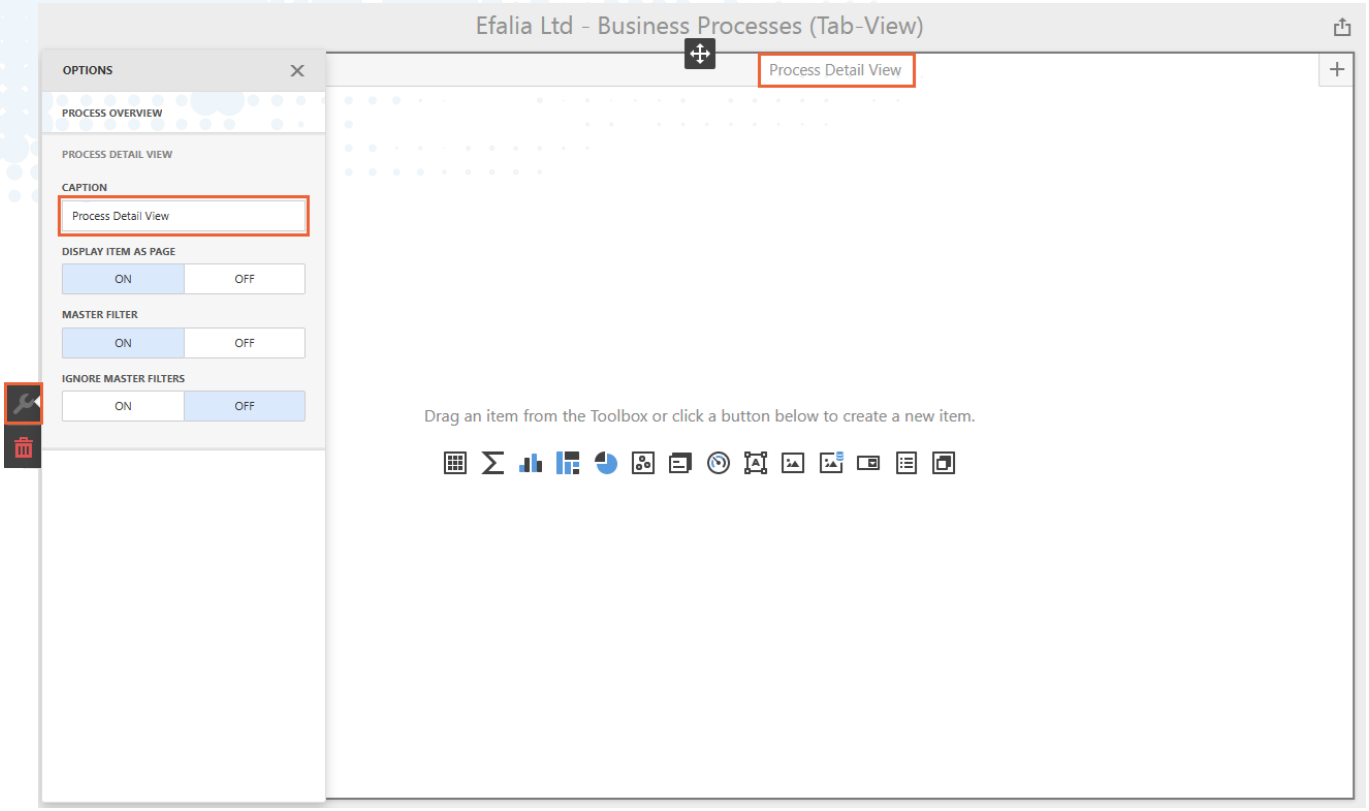

Example

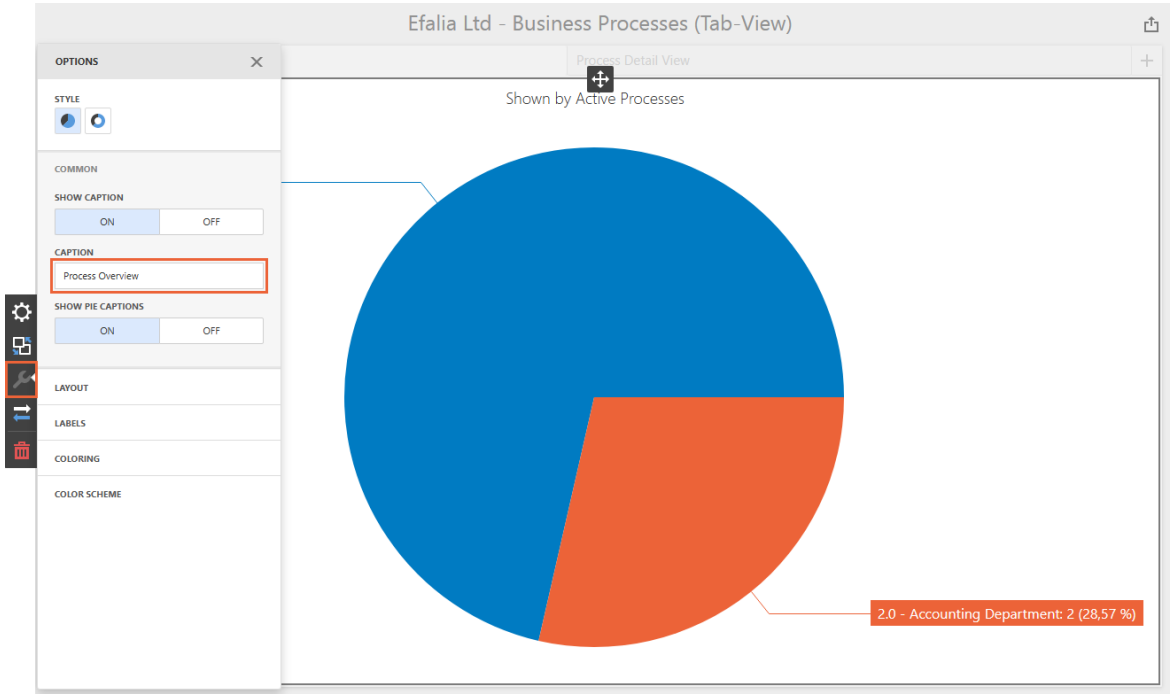

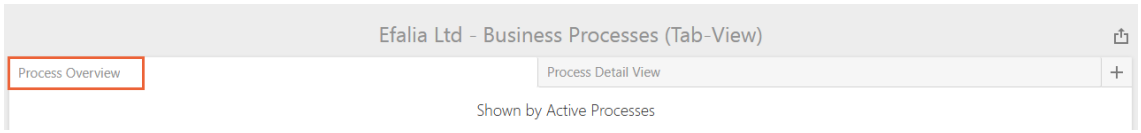

1. The selected diagram format is ***Pies***.

2. Within the ***Options*** menu of the tab container, the pages were renamed from ***Page 1*** and ***Page 2*** to ***Process Overview*** and ***Process Detail View***.

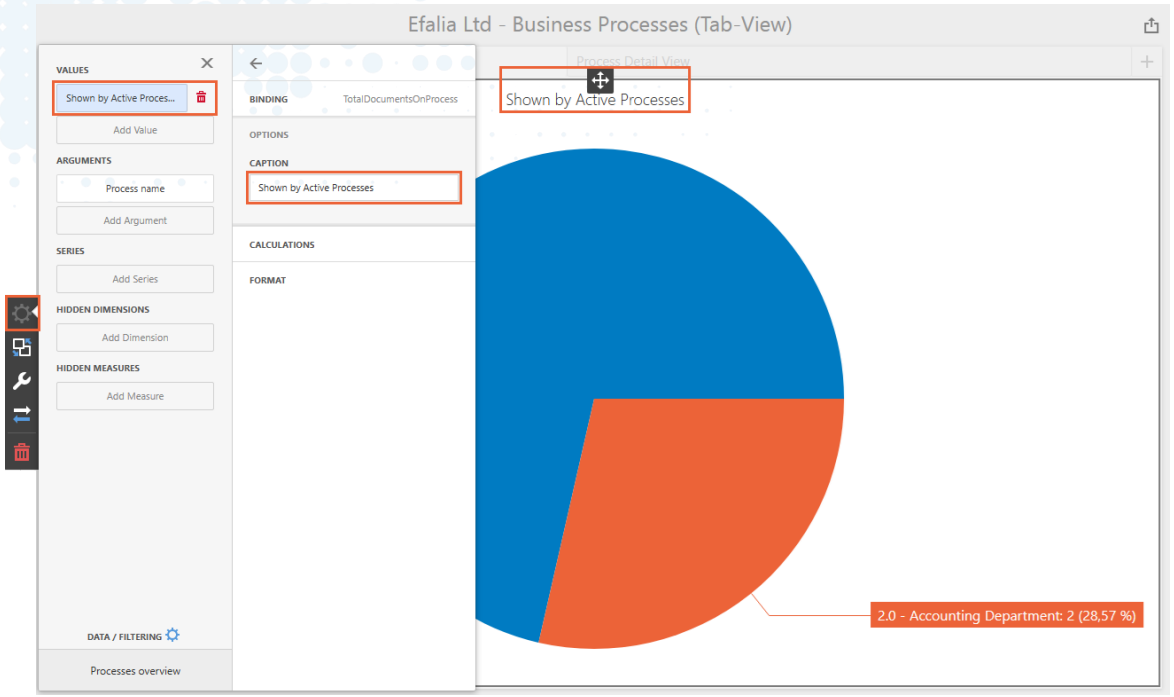

First Tab

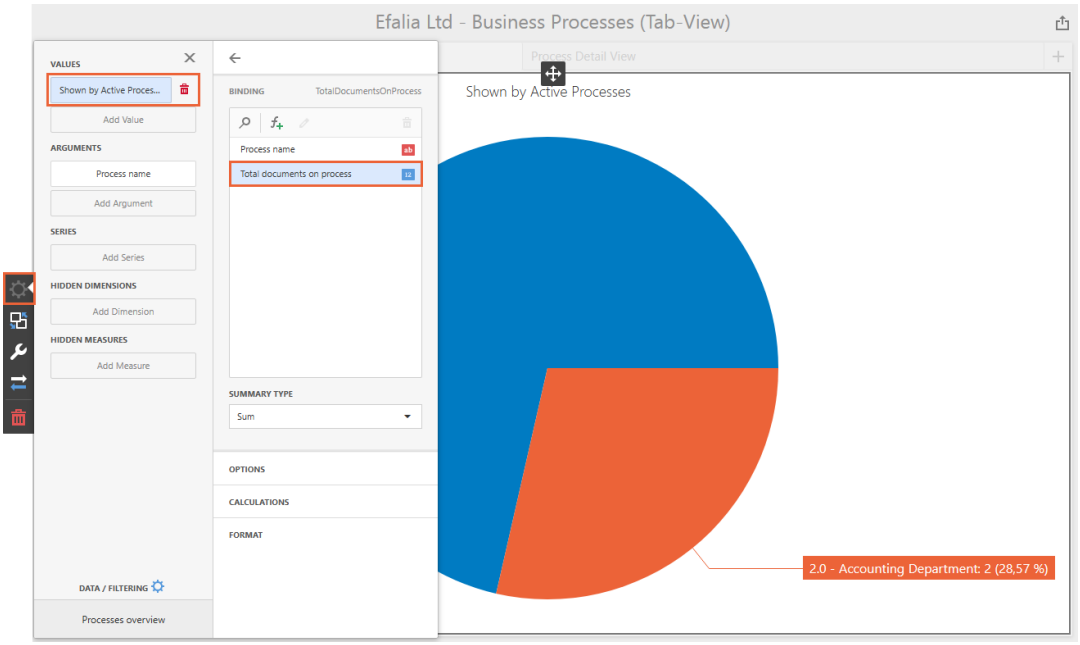

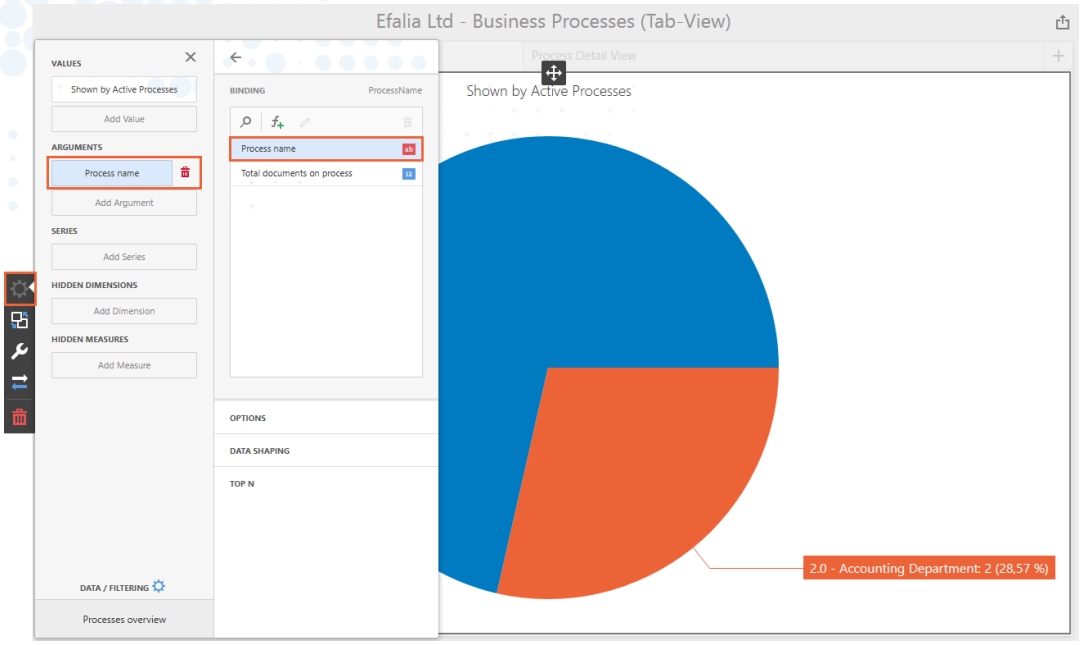

1. The ***Caption*** was changed from ***Total documents on process*** to ***Shown by Active Processes***.

2. The following ***Bindings*** were made:
    a. ***Values*** was set to ***Total documents on process***, using ***Add value*** and the ***Summary type*** was set to ***Sum***.

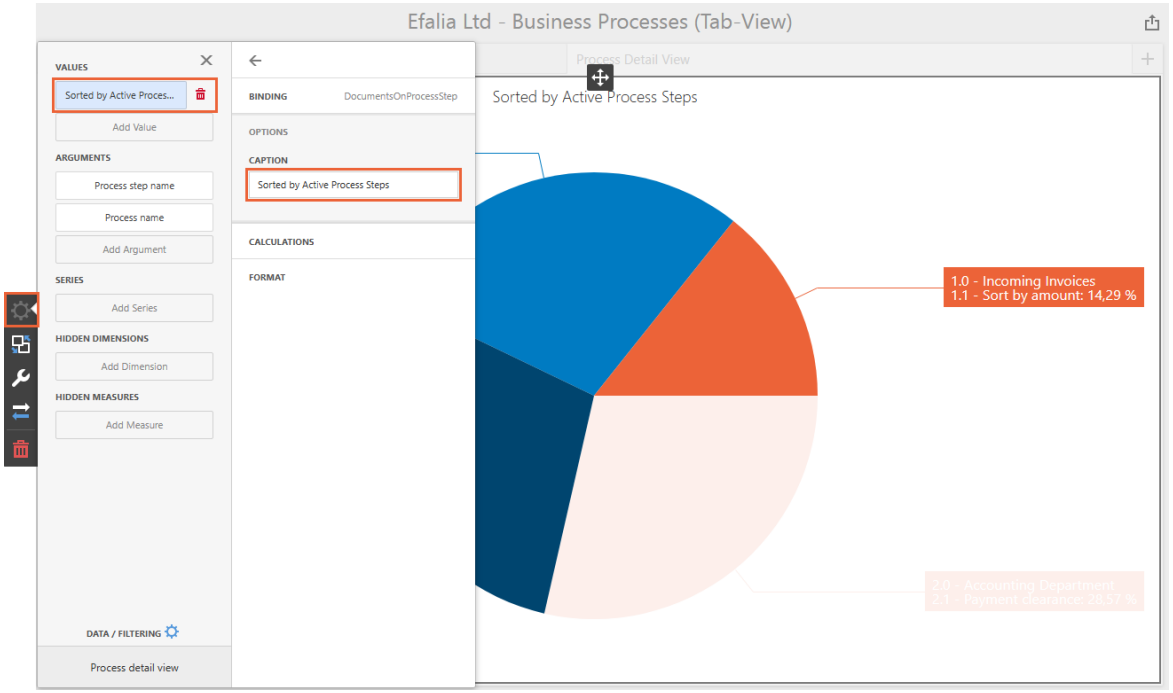

b. ***Arguments*** was set to ***Process name***, using ***Add Argument***.

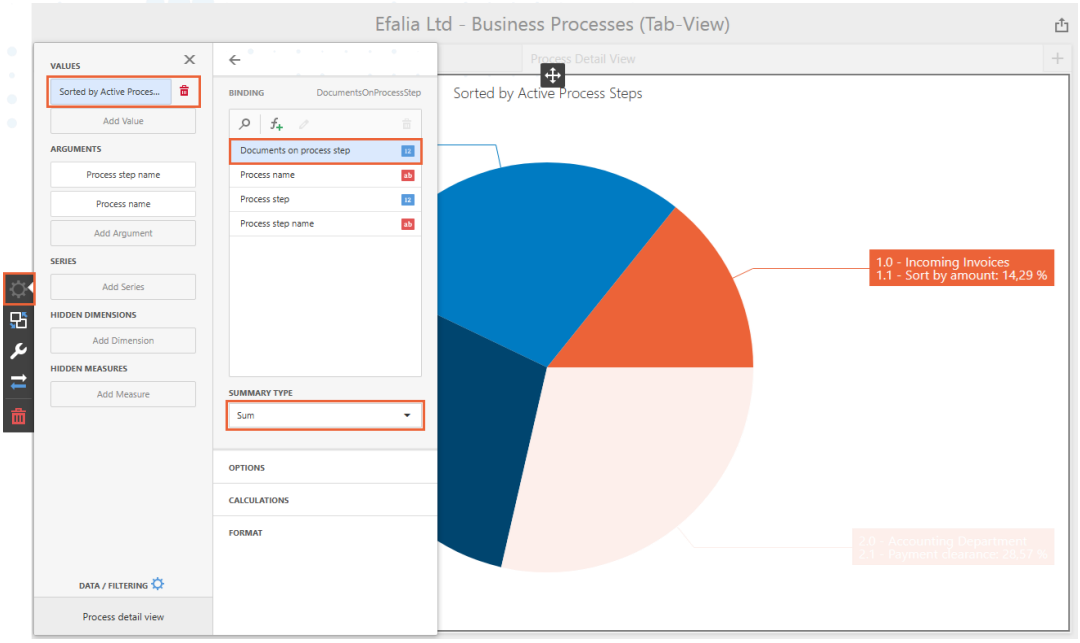

Second Tab

1. The ***Caption*** was changed from ***Documents on process step*** to ***Sorted by Process Steps***.

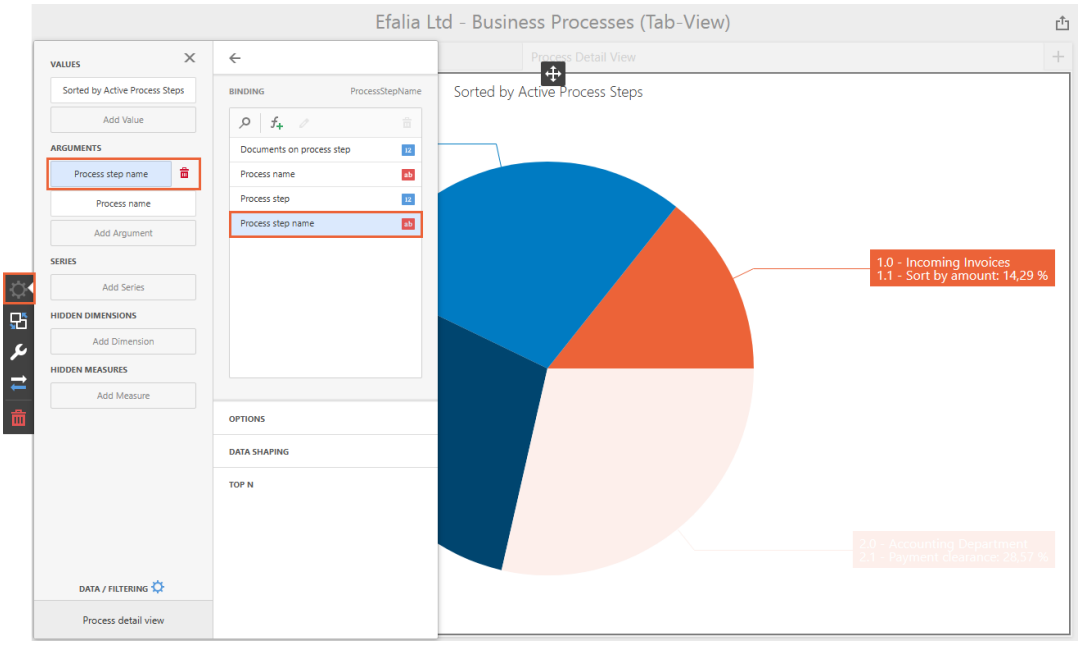

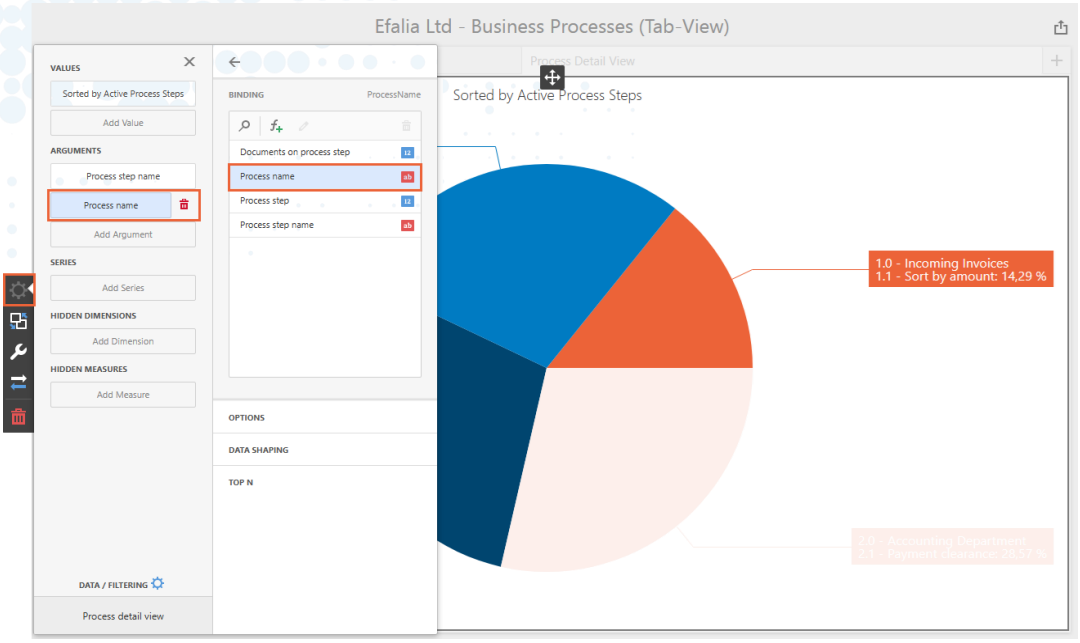

2. The following ***Bindings*** were made:

   a. ***Values*** was set to ***Documents on process step***, using ***Add value*** and the ***Summary Type*** was set to ***Sum***.

   b. ***Arguments*** was set to ***Process step name*** and ***Process name***, using ***Add Argument***.

Working with Field Values

Document Index Fields is the third possible ***Data Source***. This data source uses field value information of all documents within the specified document type.

Example

The example, given below, will show the sales invoices sorted by countries.

1. Go to the ***Dashboard menu*** on the top left side.
2. Select ***New*** from the unfolding menu.
    a. After selecting ***New…***, a unique and descriptive name should be provided in the section ***Dashboard Name***.

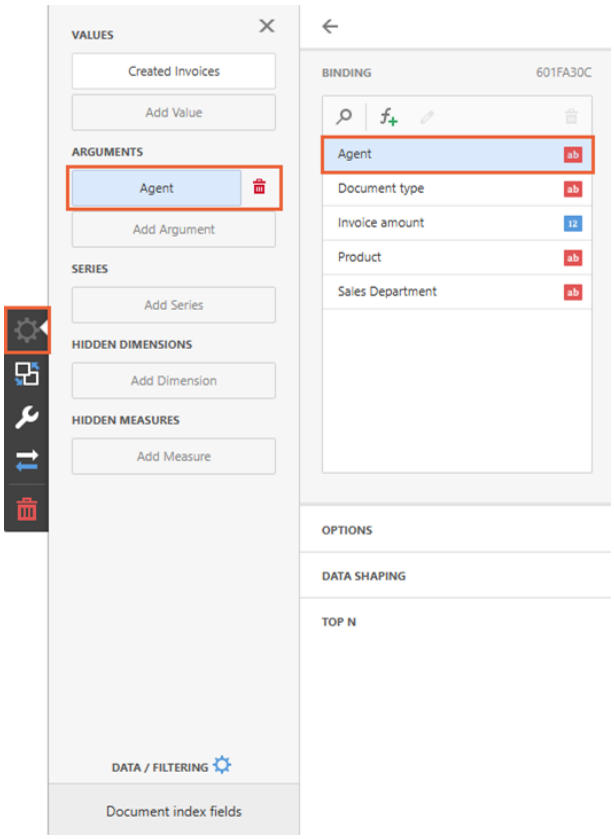

Note

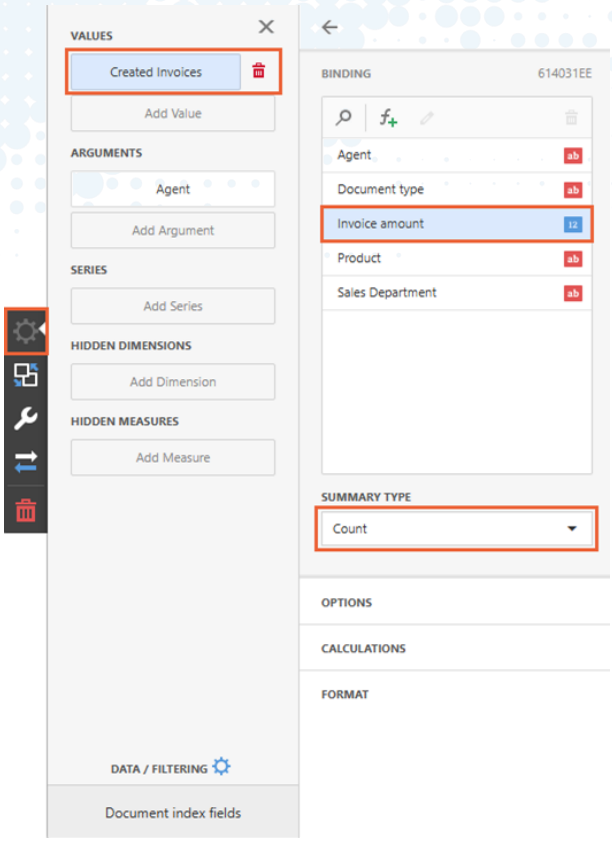

The name of an Efalia ECM Dashboard must be unique. Otherwise, the new Dashboard cannot be created.

3. The left column shows the available data sources. Select ***Document index fields*** from the list and confirm with Create.
4. Now, select a diagram type, for example ***Pie***.
5. Go to ***Bindings*** and add ***Arguments*** and ***Values***.
6. In this example, the index field ***Agent*** is used for ***Arguments*** and ***Invoice amount*** is used for ***Values***.

Note

This list always contain the static field **Document type**.

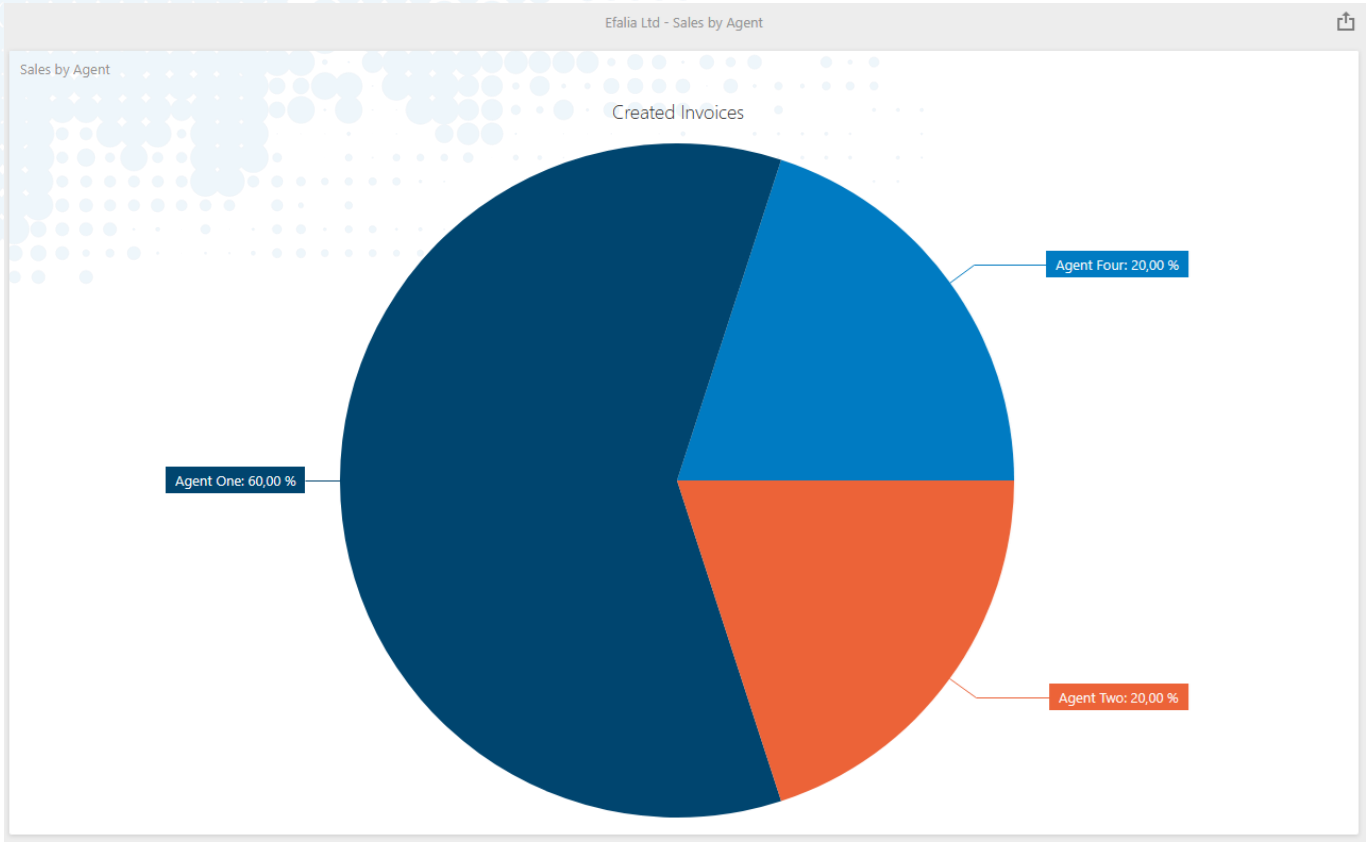

a. The ***Summary Type*** for ***Values*** is ***Count***.

Result

The result is a pie diagram, showing the percentage distribution of sales by country, according to the documents stored in this document type:

Sales invoices (5 Documents)

	!	Status	Invoice number	Customer number	Document date	Order number	Customer name	Street	Postcode	City	Country	Invoice amount	Product	Agent	Sales Department	Pages
1			4908	12345	25/01/2019	54321	Costumer Four	Street Four	44444	Berlin	Germany	6.645,43	Efalia ECM Cloud	Agent Four	Germany	1
2			4909	12342	26/01/2019	34321	Costumer Two	Street Two	22222	Lyon	France	1.169,62	Efalia ECM SBE	Agent Two	France	1
3			4910	12343	24/01/2019	34321	Costumer Three	Street Three	33333	Manchester	United Kingdom	3.915,75	Efalia ECM SBE	Agent One	United Kingdom	1
4			4907	12343	24/01/2019	44321	Costumer Three	Street Three	33333	Manchester	United Kingdom	1.031,72	Efalia ECM SBE	Agent One	United Kingdom	1
5			4906	12341	23/01/2019	14321	Costumer One	Street One	11111	London	United Kingdom	1.031,71	Efalia ECM Enterprise	Agent One	United Kingdom	1

Example

1. Go to the ***Dashboard menu*** on the top left side.
2. Select ***New*** from the unfolding menu.
    a. After selecting ***New…***, a unique and descriptive name should be provided in the section ***Dashboard Name***.

Note

The name of a Efalia ECM Dashboard must be unique. Otherwise, the new Dashboard cannot be created.

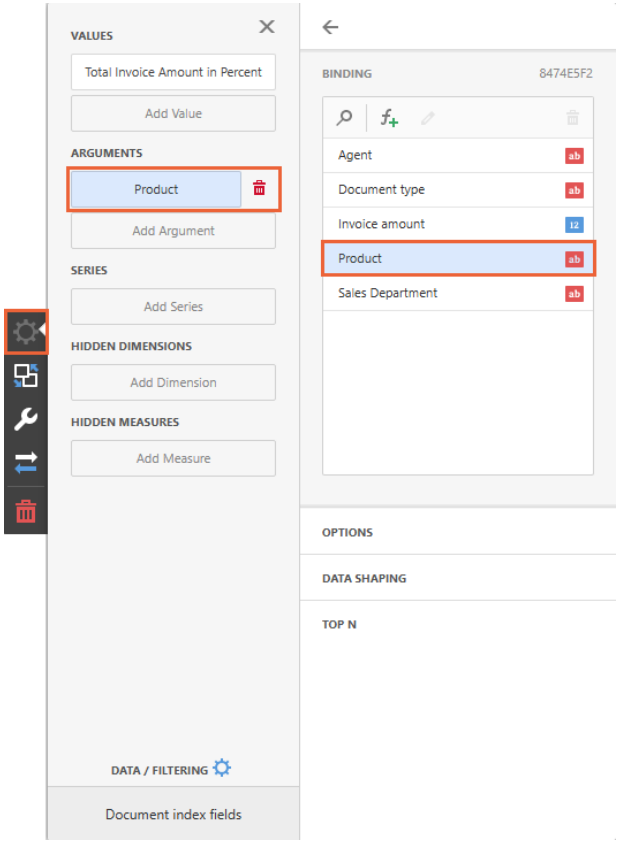

3. The left column shows the available data sources. Select ***Document index fields*** from the list and confirm with Create.

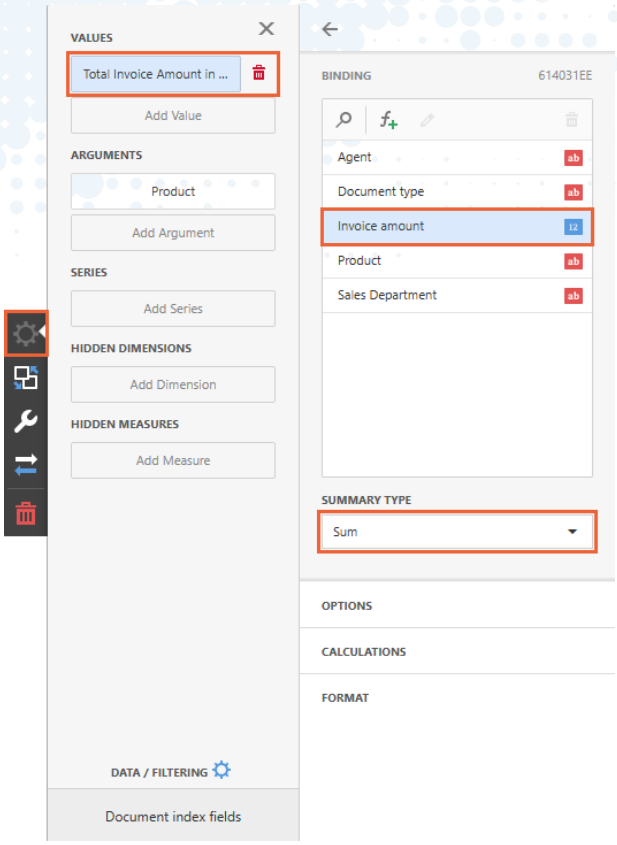

4. Now, go back to the ***Dashboard menu*** on the top left side and select ***Data source*** from the unfolding menu.
    a. On the left hand side, the previously selected data source is shown in the list of ***Used Data Sources***.
    b. On the right hand side, a list of all ***Efalia ECM index fields***, mapped to any of the cabinet's document types, is shown.

Note

This list shows only Efalia ECM fields, previously selected in Efalia ECM Enterprise Manager.

5. Now, select a diagram type, for example ***Pie***.
6. Go to ***Bindings*** and add ***Arguments*** and ***Values***.
7. In this example, the index field ***Product*** is used for ***Arguments*** and the index field ***Invoice amount*** for ***Values***.

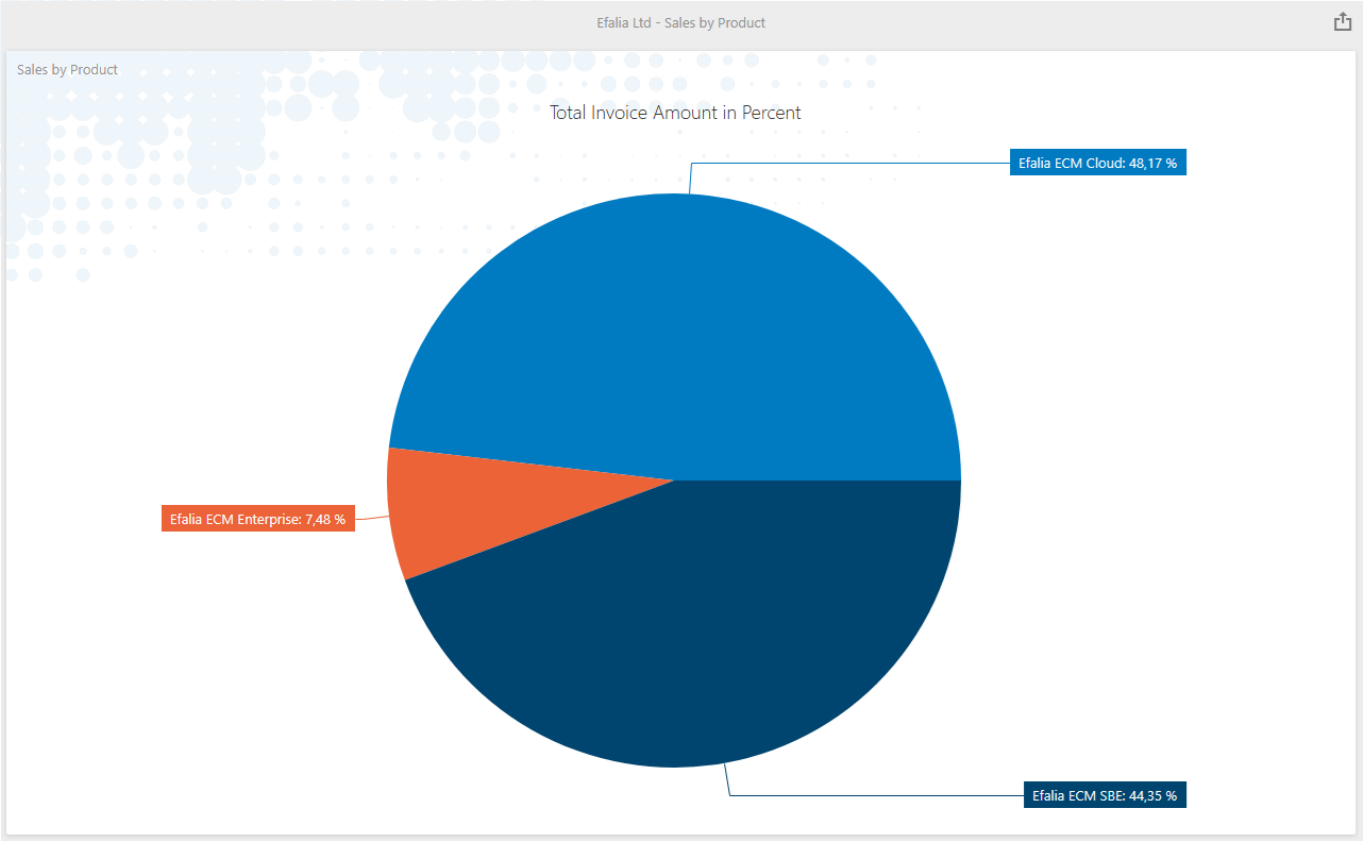

a. The ***Summary Type*** for ***Values*** is ***Sum***.

Result

The result is a pie diagram, showing the invoice amount sorted by department, according to the documents stored in this document type:

Sales invoices (5 Documents)
