WinClient (WinC) Changes

Version		Description
3.5.0.2	**Change**	• Added a new extended index field attribute ‘GPS coordinates’ which allows importing GPS coordinates stored in the image header.
	Fix	• When using the ‘Prepend’ option in conjuction with the ‘ImagePrinter’ the sort order of the prepended images was wrong.

Enterprise Manager (EM) Changes

Version		Description
3.5.0.5	**Change**	• Added a new extended index field attribute ‘GPS coordinates’ which allows importing GPS coordinates stored in the image header.
	Fix	• EM wasn’t able to restart when the last existing server connection was deleted. • Fixed a bug in the Audit trail when cancelling the ‘Archived’ loading option. • Unexpected display of ‘Upgrade cabinet’ under ‘Extended settings’ fixed.

Web Service (Server) Changes

Version		Description
3.5.0.3	**Change**	• Added a new extended index field attribute ‘GPS coordinates’ which allows importing GPS coordinates stored in the image header. • Web.config switch ‘LogIndexImportMissingMatches’ added to reflect missing matches in the ‘Audit trail’ during an index import.
	Fix	• Fixed an issue in the ‘Retention control’ where a document is set to a wrong retention phase when an error occurred.

WebServer Changes

Version		Description
3.5.0.3	**Fix**	• Fixed an issue when rendering certain views. • Fixed an issue with Brasilian-Portuguese date format in a date field. • Fixed an issue with filling the field values when editing a document with a Treeview display. • Fixed an issue when editing fields with a Treeview display.

OCR Engine Changes

Version		Description
3.5.0.1	**Fix**	• Fixed an issue when recognizing an identifier in color/grayscale mode.

Features and Changes 3.5.0.0

FileDirector 3.5.0.0 requires the Microsoft .NET Framework 4.5.
Microsoft Windows XP and Microsoft Windows Server 2003 are no longer supported.

A combination of FileDirector WinClient 3.0.0 / 3.1.0 / 3.2.0 and FileDirector Server 3.5.0 is still supported.

Type	Module	Description
Feature	EC	Our new ExplorerClient is directly integrated into the Microsoft Windows Explorer and provides an easy way to work with FileDirector cabinets like you do with files and folders.
Feature	EM, WinC, Server, WebServer	Defineable password requirements via RegEx for newly created passwords.
Feature	EM, WinC, Server	Our new FormDesigner provides a graphical user interface for designing custom forms. The forms can be provided as a link in HTML or PDF format or in the WinClient. The form and the information stored on a form is automatically stored in FileDirector as soon as a form is submitted.
Feature	EM, Server	File import scheduler option added to convert and split PDF files into TIFF/JPEG images during import.
Feature	EM, WinC	PANASONIC scanner KV-S1015C, KV-S1026C, KV-S1027C, KV-S1046C, KV-S1065C, KV-S5046H and KV-S7077 support added.
Change	EM, WinC	Global counter field action can be used in stamps to create unique ascending/descending values in stamps.
Change	EM	The option to export the Audit trail list is now also an extended button in the Audit trail view.
Change	EM	‘Process Management’ renamed to ‘Business Process Management’ (BPM).
Feature	WinC	Overlays can be linked with a document type: Create a new overlay and the document type will switch accordingly.
Change	WinC, Component Service, Retrieval	Stellent/Oracle viewer updated to the latest version to better support displaying electronic documents in FileDirector.
Feature	Component Service/Officelink	New buttons added to the Microsoft Outlook button bar to only save the Email body or the Email attachement(s) into FileDirector.
Feature	WebServer	Resolve ODBC links and fill fields on Enter key when editing a document or creating a new document.

Change	WebServer	Move focus on Enter key when editing a document or creating a new document.
Change	WebServer	File upload with multiple file selection for HTML5 browsers.
