Bug Fixes and Improvements:

Please also see the latest FileDirector 3.8 Release Notes for information about previous Fixes and improvements.

Note:

FileDirector 4.0 requires the Microsoft .NET Framework 4.7.2.
Microsoft Windows XP und Windows Server 2003 are no longer supported.

A combination of FileDirector WinClient 3.0.0 - 3.8.0 and FileDirector Server 4.0.0 is still supported.

Version 4.0

Server

4.0.0.0	CHG: Changed version number.
	ADD: Connect your way and take advantage of the powerful REST (Web API) interface.
	ADD: Connect securely with 2FA (2-factor authentication).

WebServer

4.0.0.0	CHG: Changed version number.
	ADD: Connect securely with 2FA (2-factor authentication).

WebClient

4.0.0.0 Initial version number.

It’s all about smart and secure connectivity:

Connect to your FileDirector ECM System, using the all new WebClient.

Thanks to Blazor WebAssembly and .NET 6 technology, FileDirector WebClient helps to streamline software distribution via browsers and the simplified user interface makes daily work more convenient. The 2FA (2-factor authentication) also can be used to secure your authentication.

Version 4.0

WinClient

4.0.0.0	CHG: Changed version number.
	ADD: Connect securely with 2FA (2-factor authentication).

Version 4.0

Enterprise Manager

4.0.0.0	CHG: Changed version number.
	ADD: Connect securely with 2FA (2-factor authentication).

OfficeLink

4.0.0.0 CHG: Changed version number.

EDoc Engine

4.0.0.0	CHG: Changed version number.

OCR Engine

4.0.0.0	CHG: Changed version number.

Component Service

4.0.0.0	CHG: Changed version number.

AutoCapture Client

4.0.0.0	CHG: Changed version number.
	ADD: Connect securely with 2FA (2-factor authentication).

Installation Manager

4.0.0.0 CHG: Changed version number.

Explorer Client

4.0.0.0	CHG: Changed version number.
