ScanFile V9.0.0

Type	Description
Feature	ScanFile now runs on Windows x64 OS.
Feature	New scanners added: DR-X10, DR-6050C, DR-7550C, DR-9050C, Directoryscanner, DR-6010C und DR-3010C
Change	Windows Millenium and Windows NT are no longer supported.
Fix	Printing of page numbers were always printed as -.
Fix	Reading of COLD Overlays inside a library and „Send to Email“ was wrong. Settings of several archives with several overlays were not used correctly. Instead only one setting was used from an archive.
Fix	Export, Send to Email, Send to file was wrong when using mixed COLD Overlays (TIF, JPG).
Fix	ASPI Layer for Vista x86 and Windows 7 x86 were added to the setup.
Fix	Field attributes 10.1. Copy index, ISBN and External list: Field contents were copied into library and searched correctly but the hitlist was wrong displayed.
Change	Office Add-in for Office 2010 x64 needs .NET Framework 3.5 to be installed.
