WebClient Requirements

System Requirements

FileDirector WebClient is a Blazor WebAssembly technology and Microsoft .NET 6 based solution.

Since the application is run directly within the browser, the requirements for the server providing the application are simplified to an installed and configured Internet Information Service (IIS) or an appropriate alternative e.g. Apache.

The following operating systems are recommended:

Server

Microsoft® Windows® Server 2012	Product family
Microsoft® Windows® Server 2012 R2	Product family
Microsoft® Windows® Server 2016	Product family
Microsoft® Windows® Server 2019	Product family

Microsoft® Windows® 8.1

Microsoft® Windows® 10

Notes:
Windows 8.1 and Windows 10 are only recommended for evaluation environments

FileDirector WebClient was developed with the aim of being able to run in any modern browser, regardless of the operating system environment used.

Browser

Apple Safari, including iOS	Latest version
Google Chrome, including Android	Latest version
Microsoft Edge	Latest version
Mozilla Firefox	Latest version

Notes:
Some functions are not supported by all browsers and operating system environments.
In order to use the full range of functions, a Microsoft Windows environment and Microsoft Edge or Google Chrome are recommended.
